

CMR University - E-Governance Policy

A. Preamble:

E-Governance is the use of Information and Communication Technology (ICT) in administrative functions for increasing efficiency, effectiveness, convenience, and cost-effectiveness. As the concept of e-governance has evolved along with ICT, the University too has increased e-governance, covering more and more administrative functions.

B. The objectives of e governance are -

- To increase and encourage people's participation in the governance process.
- To improve the University's information and communication technology and electronic media
- To establish transparency and accountability in the governance process.
- To reduce cost on spending academic and administration activities

C. The E-Governance Policy of the University covers the following aspects-

1. Scope of E-governance in CMR University
2. Infrastructure – ICT hardware, software, and other provisions
3. Technical team, Human resource, and training
4. Technology guidelines and Operating procedures
5. E-Governance Authority of the University

1. Scope of E-Governance in CMR University

CMR University aims to implement e-governance in the administrative functions that belong to the following categories-

a) Academic programs management

- Defining programs, curriculum
- Admission of students
- Conduct of teaching-learning as per guidelines
- Students' progress and program completion
- Statutory Committees (BOG, BOM. FC, AC, BOS, etc)

b) Research

- Research Projects Information
- Research facilities and funds
- Computer Centre and other central facilities
- IPR
- Seminars, Conferences, Workshops, etc

c) Student welfare

- Hostels- infrastructure and maintenance
- Sports, cultural and recreational facilities, and activities
- Students' Discipline
- Mentoring and guardian contact
- Training and Placement
- Feedback collection, processing, and follow-up
- Alumni networking

d) Medicine and Health

- University Health Centre
- Referral provision
- Health insurance and medical expense reimbursement

e) Estate and Engineering

- Office buildings, guest house, auditorium, canteens, sports complexes and other facilities on the campus
- Electricity (including renewable energy harnessing) and water supply and drainage
- Core communication set-up- email and phone based.
- Horticulture and plantations
- Waste Management
- Security

f) Human resource management

- Recruitment
- Payroll
- Performance appraisal and Career advancement
- Leave and perks
- Professional Development Trainings and FDPs

g) Stores and purchases

- Requirement identification and raising
- Procurement
- Tracking of assets

h) Finance and accounts

- Budget
- Fund sanctioning, billing, receipts, disbursal, and accounting
- Provident fund and other facilities

i) General Administration (covers various departments of the University)

- Documentation- minutes, resolutions, approvals
- File tracking
- Website, transparency, and RTI
- Reports required to be submitted to the statutory bodies
- Handling legal requirements

j) Internal Quality Assurance

- Audits, Recommendations, Action taken
- Agenda, minutes, resolutions of committee meetings and action taken details

k) Grievance redressal

- Committee
- Grievances receipt portal
- Agenda, minutes, resolutions of meeting and action taken details

l) Statutory Committees

- Composition and contact details of members
- Agenda, minutes, resolutions of meetings and action taken details

2. Infrastructure – ICT hardware, software, and other provisions

E-Governance requires computers, storage, networking and peripheral devices, as well as software developed for the purpose. These evolve over time and must be upgraded in the University periodically. CMR University has in place the following for the purpose of achieving e-governance-

- a) Computing servers and storage servers- these are housed in the central computer center, unless required to be housed separately for specific conditions.

- b) Networking equipment for intranet and internet. For seamless access and mobility, wi- fi networking is provided in all official and residential locations.
- c) User terminals with necessary software for each individual official who performs any input-output function in the information processing path.
- d) The University strives to achieve integration of all administrative functions under a unified e-governance platform. However, till total integration is achieved, the existing computerised systems for different functions is maintained and enhanced to meet the requirements and interoperability.

3. Technical team, Human resource, and training

The installation and major maintenance of the ICT infrastructure required for e-governance is done by vendors duly selected. For operating the infrastructure, a team of technical personnel is there in the University. The composition and strength of the team is decided by competent officers.

Existing software modules for e-governance are out-sourced. The Software Advisory Committee of the University takes the decisions regarding in-house development, external procurement, and migration to an integrated e-governance system. The external vendors of software provides necessary maintenance and enhancement, as appropriate.

As e-governance is based on computerization of the functions of different users and authorities, different categories of users must interact differently with the e-governance system. For instance, the nature of interactions by higher officers of management and that of office assistants are different. The University organizes trainings for different categories of users for using the e-governance system.

4. Technology guidelines and Operating procedures

Efforts is made to have an integrated e-governance system covering all the administrative functions of the University. Till that is achieved, or wherever that is not feasible, efforts are made to make the independent modules inter-operable. The main aspects of inter-operability is -

- a) Consistency of data across modules
- b) Minimum duplicity of data across modules

- c) Minimum manual data entry during processing of information from multiple modules

A team comprising in-house experts and members of the user-departments finalises the operating procedures for the e-governance systems in consultation with the in-house software development team or the external vendors supplying the software, as applicable. These procedures cover details of initial configuration, administrative user inputs, end-user inputs, output, and routine maintenance steps. Information privacy and role-based access control is in place. Data entry and update is trackable.

The e-governance system is able to provide information to support planning of activities, using modern technologies such as data science.

The e-governance system provides security against cyber-attacks and technical failures.

The e-governance system in CMR University conformed to the prevailing guidelines from the Government of India on these matters.

5. E-Governance Authority of the University

A high-powered Committee headed by the Vice-Chancellor takes decisions regarding phase-wise adoption of e-governance in different functions, technology selection, and fund allocation. The Software Advisory Committee provides technical advice to this higher Committee.

User groups may submit new requirements of e-governance to the Software Advisory Committee.

The Software Advisory Committee identifies training needs for the different categories of users from time to time, and initiate the process of trainings with the help of the Software Team and external agencies.

D. E-governance at CMR University

1. General Administration

The various ways of introducing technology in education institution administration are the following

- a) Admissions through web-enabled services.
- b) All day-to-day activities of the University.
- c) Staff administration.
- d) Single Window System for students.

2. HR Management Software (GreytHR Platform)

HRMS platform is of utmost importance for competitive organizations. It plays a crucial role in automating HR processes, thus ensuring smoother work flow. It allows the HR to access workplace and performance insights.

The key features of the GreytHR HR platform which are used at CMR UNIVERSITY are as follows:

- a) **Time and Attendance Management:** This feature helps businesses understand the workforce availability real-time. The total time spent by an employee on a given task/project can be effortlessly calculated with T&A module. This also assists in recording absenteeism, and accurate payroll processing.
- b) **Payroll:** Process payroll faster while maintaining high accuracy. Process complex payrolls by synchronizing employee data with payroll details. Hence ensuring error-free timely payments and statutory compliance.
- c) **Recruitment:** The software for HR Management simplifies the traditionally lengthy recruitment process. The modern HR needs a faster and futuristic recruitment process on a low cost. Hence, opt for features like manpower planning, multi-channel sourcing, interview scheduling etc.
- d) **Self-Service Portal:** The self-service portal lets employees edit/update their personal information. This facilitates quick updates and ensures information accuracy. Employees can view and download their payslips, employee handbook etc. Important documents can be uploaded/accessed by the HR Manager and the employee. Therefore, employees no longer have to wait for HR to make changes to their personal data.

- e) **Claims & Re-Imbursements:** Streamline mobile, travel and expense claims with this feature. Since the HR software can configure claims as per the company policy and the employee levels. Furthermore, this way, the company can validate employee efforts and claims.
- f) **Leave Management:** It is one of most essential features of a good HR Management Software. Gone are the days when you had to go through email leave requests to keep track of employee leaves. It is especially relevant for the HR Manager, who now gets a real-time view of the employees at work. It enables easy resource allocation of tasks/projects. In addition, he/she can easily customize holiday calendars for different countries, leave policies, regularizations, etc. Moreover, an employee can log in to the software at any time to view their leave status, historical data and apply leaves.
- g) **Employee Creation and Database Management:** Use the manual and automated pre-hire data capture functionality. Complete the employee creation process in less than 10 minutes. The recruiter has to as enter in quick fields to welcome the new employee onboard smoothly.

3. Engagement with students and Alumni:

With the help of ICT tools students are able to

- a) Access digital information efficiently and effectively
- b) Engage in self-directed learning
- c) Produce a creative learning environment
- d) Promote collaborative learning in a distance-learning environment

4. Learning tools and examination tools

i) Paperless Examinations

Paperless Examinations Advantage (PEXA) is a secure ecosystem consisting of customized software and purpose- built hardware. This ecosystem includes a specially developed secure software system and services in the cloud, making it an end-to-end solution for students, faculty and administrators. Biometrics restricts access and prevents impersonation.

The PEXA Ecosystem solves a number of challenges currently faced by examination authorities.

- a) The entire process of conducting an exam, right from authoring questions, delivering the exams, evaluating the responses and declaring results can be accomplished digitally, thereby eliminating the necessity of paper in the entire process.
- b) Time – the exam process can be reduced by up to 75%
- c) Logistics for question papers and answer scripts, specially where exams are over a number of centres spread out over a large area.
- d) Evaluation – Fast turnaround and ease of evaluation from anywhere and transparency in assessment.
- e) Question paper leakage.
- f) Cheating at exam centres.
- g) Candidate impersonation.
- h) Disputes over evaluation and reassessment.

ii) Juno Campus Online Learning Management Platform (LMS)

Moodle is a free, online Learning Management system enabling educators to create their own private website filled with dynamic courses that extend learning, anytime, anywhere. Whether you're a teacher, student or administrator, Moodle can meet your needs.

Moodle's extremely customizable core comes with many standard features such as

- a) Flexible learning
- b) Mobile Learning
- c) Accessible for all
- d) Privacy and security
- e) Easy Integration
- f) Complete Ownership
- g) Customize the functionality

Advantages for Administrators, Teachers and Students

- a) **Direct learning paths:** Design and manage courses to meet various requirements. Classes can be instructor-led, self-paced, blended or entirely online.
- b) **Encourage collaboration:** Built-in collaborative publishing features foster engagement and encourage content-driven collaboration.
- c) **Group management:** Group learners to share courses, differentiate activities and facilitate team work.
- d) **Marking workflow:** Conveniently assign different markers to assignments, manage grade moderation and control when marks are released to individual learners.
- e) **Peer and self-assessment:** Built-in activities such as workshops and surveys encourages learners to view, grade and assess their own and other course members' work as a group.
- f) **Outcomes and rubrics:** Select from advanced grading methods to tailor the gradebook to your course and examination criteria.
- g) **Competency based marking:** Set up competencies with personal learning plans across courses and activities.
- h) **Security and privacy:** Teach and share in a private space only you and your class can access.

ii) CODETANTRA and Bizotic for Placement Training

CodeTantra platform is an interactive, intelligent platform to learn programming, and Bizotic is used for Reasoning & Aptitude training. Following are the features associated with these platforms:

- a) Organizations & user management with role based access control with secure multi-factor authentication
- b) Curriculum management, controllable at individual as well as organization hierarchy level
- c) Rich online course authoring & design with support for rich media, animations, etc.

- d) Auto-evaluated question types include computer programming in multiple languages, variants of multiple choice, fill in the blanks, numerical type, match columns, spoken English, reading comprehension, listening comprehension, etc.
- e) Manually evaluated question types include subjective essay, viva voce, document upload, etc.
- f) Timed assignments and self-paced exercises
- g) Testing and assessment platform
- h) Secure digital vault for question banks
- i) Live online classes with full timetable integration

iv) Library management system:

CMR University's Library manages knowledge, both in print and digital formats, ensures seamless discovery and access to these scholarly resources, and provides faculty, students, and staff with professional support to find, evaluate, manage, and use such resources. It provides high-quality ambiance for both reflective and collaborative work and study.

At CMR UNIVERSITY we use Koha. Koha is the world's best open-source library automation software. Koha has most of the features that is expected in an ILS, including:

- a) Union catalog facility
- b) Customizable search
- c) Online circulation
- d) Bar code printing

About E-Governance

IQAC has several initiatives at CMR University (CMRU). Two of them are very much distinctive. Those two initiatives have been shown below.

E-governance initiatives at CMRU

CMRU has implemented several e-governance initiatives through its IQAC which are aimed at enhancing administrative efficiency, transparency, and overall effectiveness of the educational process. These initiatives leverage digital technology to streamline operations and improve the experience for students, faculty, and staff.

Digital Admissions

CMRU has introduced an online admissions portal that simplifies the application process for prospective students. This system allows applicants to submit documents, track their application status, and receive updates digitally, reducing paperwork and processing time.

Learning Management System (LMS)

The university has adopted a robust LMS to facilitate online learning and manage academic resources. This platform enables students to access course materials, submit assignments, participate in discussions, and receive feedback, thus supporting a blended learning environment.

Student Information System (SIS)

The SIS provides a centralized platform for managing student records, including enrolment, grades, attendance, and personal information. This system ensures data accuracy and easy retrieval, aiding both students and administrative staff.

E-Library

The digital library at CMRU offers access to a vast collection of e-books, journals, and research papers. This resource supports academic and research activities by providing easy access to information and reference materials.

Financial Management

The university has implemented e-governance solutions for financial management, including online fee payment systems. This ensures secure and convenient transactions for students and efficient financial administration for the institution.

Human Resource Management System (HRMS)

The HRMS facilitates efficient management of faculty and staff records, payroll, leave applications, and performance appraisals. This system enhances transparency and streamlines HR processes.

Feedback and Grievance Redressal

Online platforms for feedback and grievance redressal allow students and staff to voice concerns and suggestions. This system ensures timely resolution of issues and continuous improvement in university operations.

Through these e-governance initiatives, CMR University is committed to fostering a technologically advanced and efficient educational environment, aligning with contemporary needs and ensuring better service delivery.

Professional Development Institute (PDI) at CMR University

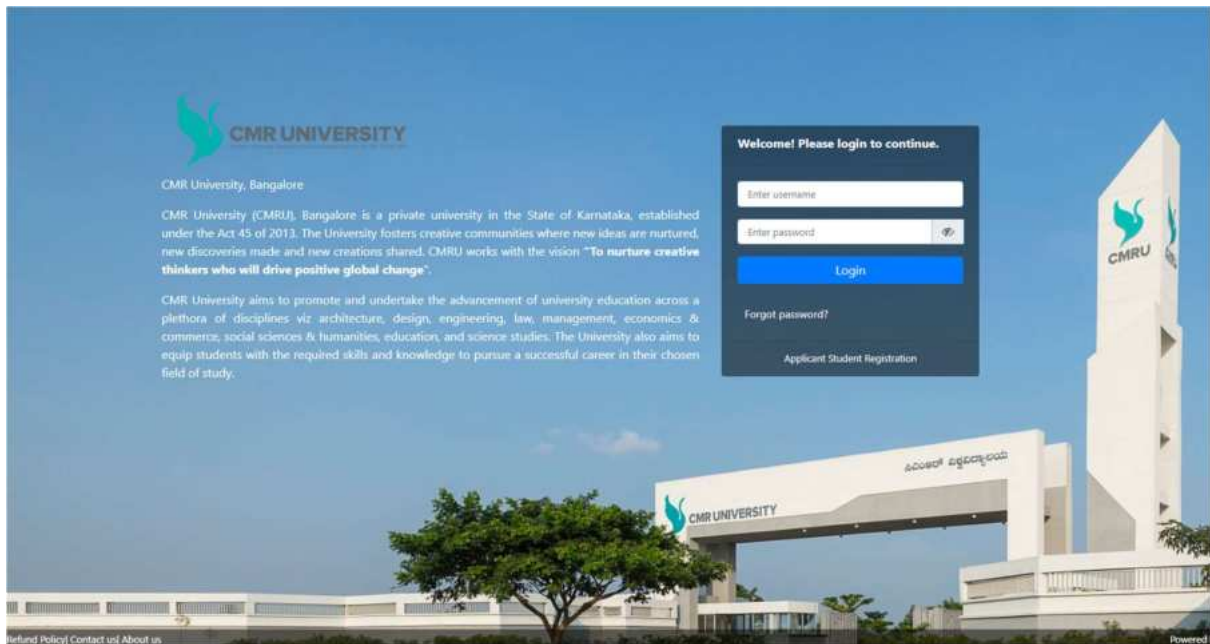

The Professional Development Institute (PDI) at CMR University (CMRU) plays a pivotal role in enhancing education quality and fostering continuous professional growth among faculty and staff. The institute is dedicated to equipping educators with the latest pedagogical skills, research capabilities, and industry knowledge, ensuring they deliver high-quality education aligned with contemporary academic standards and industry demands.

Comprehensive training programs are very common at CMRU.

PDI offers a range of training programs, workshops, and seminars designed to enhance teaching methodologies, integrate technology in classrooms, and develop innovative assessment techniques. These programs cover various aspects of education, from curriculum design to student engagement strategies. Research and innovation support is provided through PDI. The institute provides faculty with resources and training to advance their research skills. It organizes workshops on research methodology, grant writing, and publication in reputed journals. By fostering a research-oriented mindset, PDI helps faculty contribute to academic knowledge and stay at the forefront of their disciplines. Industry collaboration and exposure is essential in the modern times. PDI facilitates partnerships with industry leaders and organizations to keep faculty updated with the latest industry trends and practices. Guest lectures, industry visits, and collaborative projects are regularly organized, ensuring that educators can impart practical and relevant knowledge to students. Leadership and management training is also a part of PDI initiatives. Recognizing the importance of strong leadership in academic institutions, PDI offers specialized training programs for academic leaders and administrators. These programs focus on strategic planning, decision-making, and effective management of educational institutions.

Through these initiatives, the PDI at CMR University significantly contributes to education quality improvement, ensuring that faculty and staff are well-equipped to meet the evolving needs of students and the academic community.

Course Description : *	Corporate Accounting is a comprehensive study of the accounting principles, methods, and techniques used in the financial reporting, analysis, and compliance as they apply to corporate entities. Students will learn to prepare standards and regulations.
Course Learning Objectives : *	CLO1: To understand the method of valuation of Intangible Assets. CLO2: To familiarize the different methods of valuation of Intangible Assets. CLO3: To Comprehend the different methods of Mergers and Acquisition of Companies. CLO5: To familiarize students with the use of accounting software like Excel or dedicated accounting software packages to perform calculations and create financial statements.
Pedagogy : *	1. Lectures and Discussions: Traditional lectures can provide a foundation for understanding accounting principles. Incorporate real-world examples and case studies to illustrate concepts. 2. Practical Application: Assign practical exercises and problem sets to students to use accounting software like Excel or dedicated accounting software packages to perform calculations and create financial statements.
