## WHY CMR UNIVERSITY?

CMR University (CMRU), Bangalore is a private university in the state of Karnataka, established under the Act 45 of 2013. The University fosters creative communities where new ideas are nurtured. CMRU works with the Vision “To nurture creative thinkers who will drive positive global change.”

With a new-age INNOVATION CENTRE in place, CMRU provides students from all programmes a sophisticated platform to enhance their learning experiences. CMRU also focuses on making learning and development more student-friendly across all Schools of Studies. CMRU Accelerated Credits programme enables all candidates the opportunity to earn 2 Credits right at the Registration Phase. Conforming with statutory norms set by UGC Guidelines set for Higher Education Institutions (HEIs), CMRU outclasses the rest by scoring remarkably in the areas of Education, Placement, Research, Sustainability, Best Practices and more.

## WHY CMRU SCHOOL OF ARCHITECTURE?

**Diverse and Dynamic Curriculum:** The School of Architecture at CMR University offers a diverse and dynamic curriculum that combines theory with practice.

**Experienced Faculty:** The faculty at the School of Architecture comprises experienced professionals with vast knowledge and expertise in the field.

**State-of-the-Art Facilities:** The School of Architecture is equipped with state-of-the-art facilities, including design studios, computer labs, and a well-stocked library.

**Industry Exposure:** The School of Architecture encourages students to participate in industry events, workshops, and internships to gain hands-on experience and build professional connections.

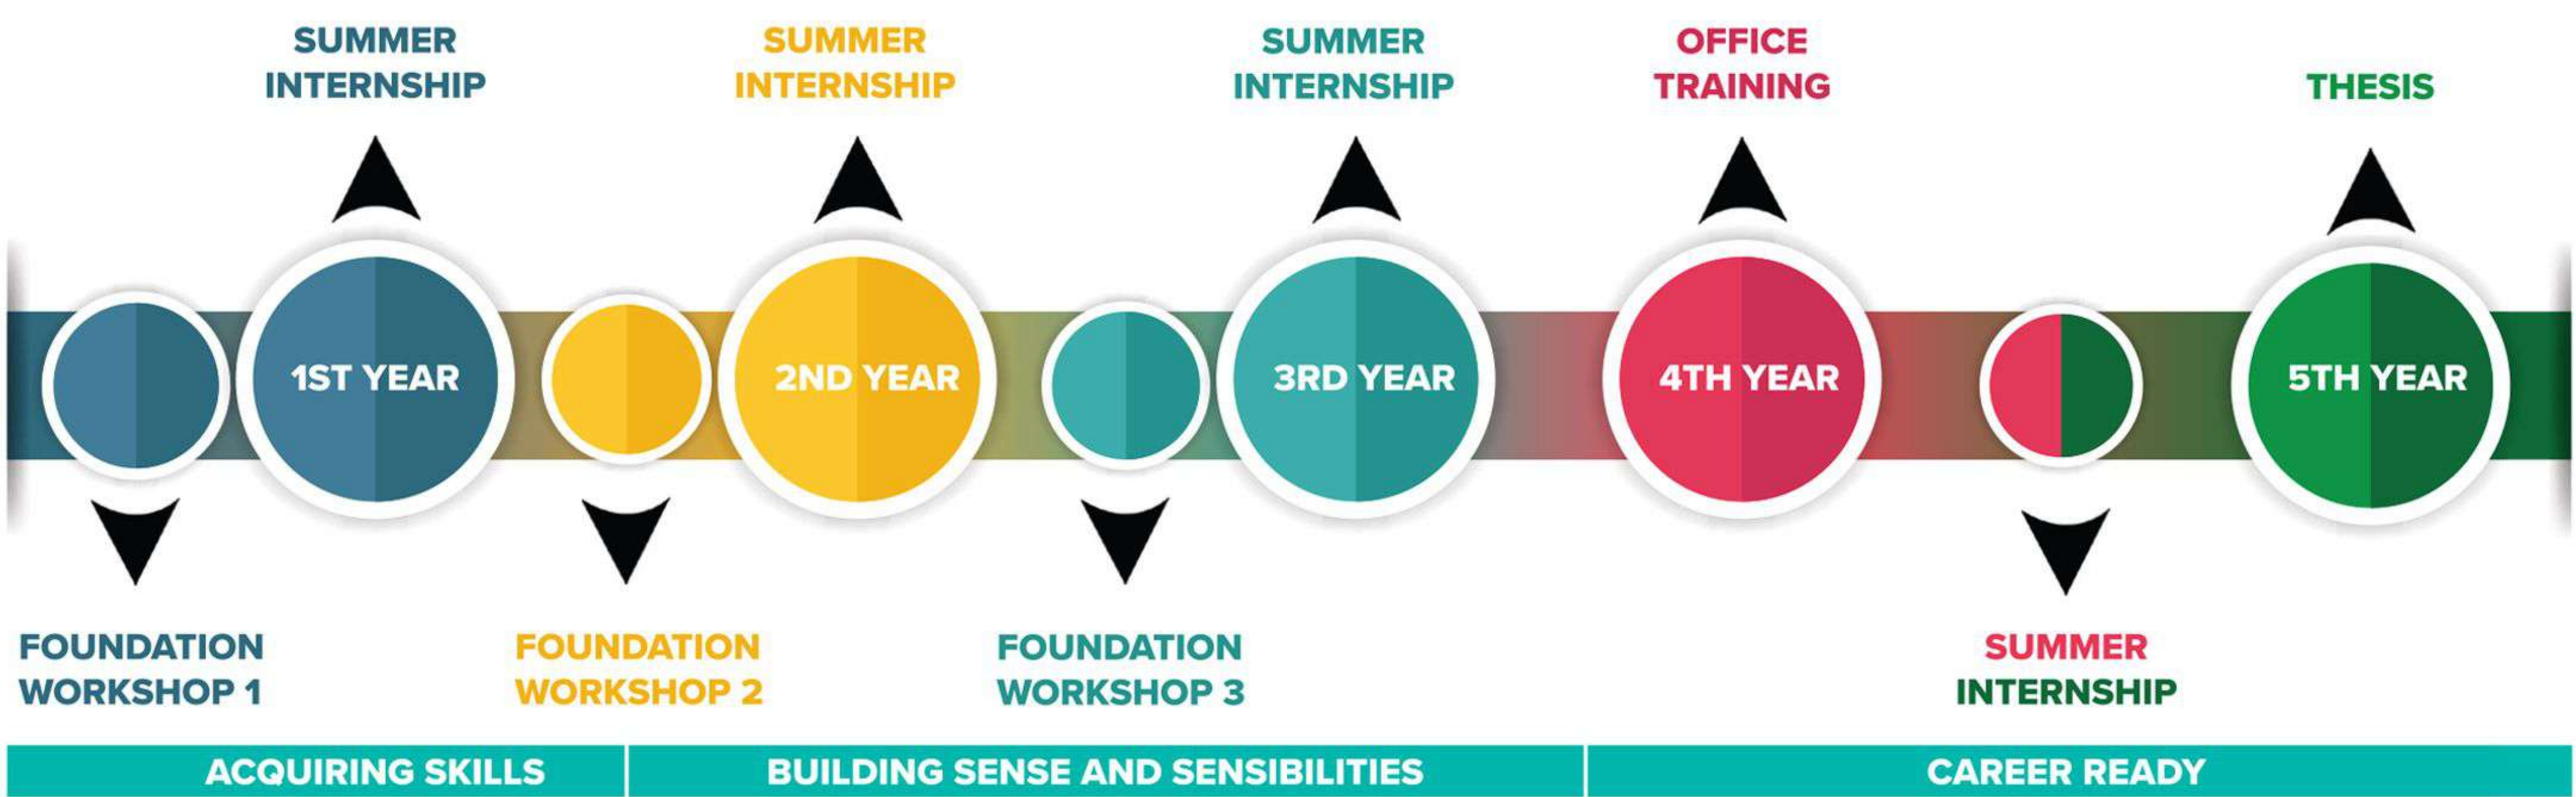

**Career Opportunities:** The School of Architecture has a strong industry network, which provides students with numerous career opportunities upon graduation.

# SCOPE OF ARCHITECTURE

Pursuing an education in architecture opens up a world of creative possibilities. As an architect, you have the power to shape the built environment, creating spaces that not only serve a functional purpose but also inspire and delight. With your skills, you can design everything from soaring skyscrapers to cozy homes, from grand public spaces to intimate private gardens. At CMR University’s School of Architecture, you will be able to explore the intersection of art, science, and technology, using cutting-edge tools and techniques to turn your visions into reality.

## CUMULATIVE LEARNING AND CONTINUOUS ASSESSMENT

### Foundation Year - Laying the groundwork

The first year is the most crucial part of the student journey. It is at this wide-eyed, curious phase that the students settle into a mindset that accelerates them through the entirety of the programme. Hence, it is imperative to inculcate a positive outlook and a 'can do' attitude at this stage. This year is all about learning, unlearning, and relearning.

### Fundamental Core - Mindful, methodical skill augmentation

The subsequent years are filled with activities for students to understand the interdependencies of various technical and aesthetic fields and how this symbiosis results in impactful and purposeful architectural practices. Thus, the curriculum is fashioned to be part of a larger ecosystem consisting of infrastructural and expertise-based provisions.

### Professional Development - Opening up new opportunities

The last 2 years are all about sculpting a conscientious and diligent professional out of the student, helping them to become global citizens with an apt skillset. A minimal level of industriousness is incorporated into the students through hands-on learning activities and exposure to real-world scenarios and professionals in various capacities.

### Holistic Enhancement - Sculpting the best out of everyone

The focus is on shaping students into responsible and hardworking professionals who possess the necessary skills to become global citizens. Through practical learning experiences and interactions with professionals from different fields, students have been instilled with a strong work ethic. This has prepared them to tackle real-world challenges with confidence and competence.

# LEARNING BY DOING

Students at the School of Architecture are engaged in first-hand experience of making. This enables students to be more sensitive and practical towards their designs. Based on this approach the curriculum consists of many workshop based courses such as Foundation workshops, Full Scale workshop, etc. This also enables multi-disciplinary and trans-disciplinary learning.

# SHOWCASE & EXHIBITIONS

CMRU enhances the student journey by engaging them in exciting activities under various clubs. There is something for every student here. The School encourages students to organize and participate in various events and activities. The School also has various clubs formed under the University's LEAP programme. This enables the students to pursue and learn various skills and enhance their leadership qualities.

# INFRASTRUCTURE

CMR University's School of Architecture is well-equipped with modern infrastructure and state-of-the-art facilities to provide students with a comprehensive learning experiences. The school's campus houses spacious design studios, well-equipped computer labs, and a well-stocked library that provides students with access to a vast collection of books, journals, and periodicals related to architecture and design.

## HOW CMR UNIVERSITY GIVES A COMPETITIVE EDGE TO THE STUDENTS

Attract and retain well-qualified **full-time faculty** and highly skilled architectural professionals.

Create necessary **infrastructure** appropriate to the needs of programs and activities of the School.

Create and facilitate an ambience for **interdisciplinary engagement** among students and faculty and an attitude for learning by doing.

Develop and operate **mutually beneficial programs** partnering with architectural professionals and NGOs.

Create necessary framework for the faculty and students to engage in **professional competitions, assignments and research**.

Engage with building industry, civic bodies and general public to work towards addressing the **civic issues** of Bengaluru city and its environs.

Create mechanisms to understand and address **societal problems** in order to make a **positive impact in social**, economic and ecological terms.

Create necessary online and offline **information infrastructure**.
