(5) Shri.LAKSHMEESH aged about 40 years,
s/o.K.V.Ramaswamy Iyengar, residing at No.10, J Block,
'B' type, Sarvagna Road, Kuvempu Nagar, Mysore-570
032 hereinafter called the TRUSTEES of the OTHER PART.

WHEREAS Shri.Chikkamuniappa Reddy, the father of
Trustees 1 & 4 and the father-in-law of the Authoress
above had authored a draft Trust Deed and on the basis
the said draft (unexecuted) trust Deed, had created a
Trust under the name 'CMR JNANADHARA TRUST'. And in
pursuance of the objects of the charitable trust, the
author had made a donation to the corpus of the Trust
and had also got donated immovable property comprised in
a portion of Sy.No.19/1, Kacharakanahalli, Bangalore
North taluk.

AND WHEREAS, Mrs.Sabitha Ramamurthy, the above
said authoress, also registered Deed of Trust dated 29-
5-1991 and the said Trust was also named 'CMR JANANDHARA
TRUST'.

ON ACCOUNT of the existence of two similar Trusts
by similar names and with similar objectives, there
arose confusion and chaos. Simultaneously, there was
also dispute as regards the ownership of the former
Trust's immovable property between Trustee No.1 above
(who is the Secretary of the former Trust) and
Shri.K.C.Ramamurthy who claimed to be the owner in

possession of the immovable property. As a result of the rival claims, the matter went to Court and the Secretary of the former Trust obtained an order of Injunction against the abovenamed K.C.Ramamurthy.

And by the intervention of friends and well-wishers of both the Parties, the parties had reached an amicable settlement and sought to compromise the matter in terms of a Memorandum of Understanding filed before the Court. And the Hon'ble Court (CCH NO.15) in O.S.No.394/1993 had passed a Decree directing registration of a Trust Deed with objects similar to those found in the unexecuted draft Trust Deed dated 13-6-1980 and in supersession of the Trust Deed dated 29th May 1991 registered as Document No.57 of 1991-92 Book IV vol.84 pages 78-90 at the Office of the Sub-registrar, Bangalore North Taluk.

And in pursuance of the Decree of the Hon'ble Court, the Authoress abovenamed and the Trustees had registered a Trust under a Deed dated 28-4-1993 registered as No.107/93-94 in Book IV, Vol.279 pages 63-69 at the office of the Sub Registrar, Shivajinagar, Bangalore and had applied for registration of the said Trust under the Income Tax Act 1961. And the Income Tax authorities have suggested inclusion of certain clauses to the said Trust Deed. Therefore, it is deemed fit and proper to replace the abovesaid Trust Deed by a more compact Trust Deed containing the clauses suggested by the Income Tax Authorities.

Now, therefore, the Authoress and the Trustees have

Details of Curriculum Design

Curriculum:

- 1) Every Programme has a prescribed course structure which, in general terms, is known as the Curriculum or the Courses of Study or the Scheme of Teaching and Evaluation. It prescribes all the courses/ laboratory/ other requirements for the degree and sets out the nominal sequence semester wise. It also provides the syllabus and a list of text/ reference books (or other learning material sources) for each course.
- 2) The University shall not only lay down the syllabus for each course, but also the manner of its implementation, namely, through lectures, tutorials, laboratory sessions, seminars, field work, projects and such other activities.
- 3) The Courses of Study details are updated every semester and are made available at the respective School page of the University website: <http://www.cmr.edu.in/>.
- 4) Curriculum may also include SWAYAM or Massive Open Online Courses (MOOCs), offered by premier Institutions worldwide. However, selection of SWAYAM or MOOCs, if any, shall always be within prescribed guidelines of the relevant regulatory bodies.

Course Credit Structure:

- 1) A certain quantum of academic work, measured in terms of credits, is laid down as the requirement for completion of degree in the different programme and the available specialization areas. A student earns credits by satisfactorily completing courses/ other academic activities every semester.
- 2) The credits are distributed semester wise, as prescribed in the Scheme of Teaching and Evaluation for each of the programmes. The courses generally progress in sequences, building competencies as per the course learning outcomes. The positioning of a course indicates certain academic maturity on the part of the students.
- 3) Some courses do, in addition, specify passing in other courses, offered earlier in the programmes, as prerequisites for the course.
- 4) Students are required to follow the semester wise schedule of courses specified in Scheme of Teaching and Evaluation; they do, however, have freedom to follow alternative schedules to optimize their academic profile with additional courses, keeping the requirements for each course in mind. For students with backlog courses, such rescheduling may even become necessary. Such departures from suggested schedules need to be done very carefully, and always with advice from the Faculty Adviser.

Courses:

There will be following types of courses in a programme, namely:

- 1) **Core Course:** A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.
- 2) **Elective Course:** Generally a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/ subject of study or which provides an extended scope or which enables an exposure to some other discipline/subject/domain or nurtures the candidate's proficiency/skill is called an Elective Course.
 - a) **Discipline Specific Elective (DSE) Course:** Elective courses may be offered by the main discipline/ subject of study is referred to as Discipline Specific Elective.
The University may also offer discipline related Elective courses of interdisciplinary nature (to be offered by main discipline/subject of study).
 - b) **Generic Elective (GE) Course:** An elective course chosen generally from an unrelated discipline/subject, with an intention to seek exposure is called a Generic Elective. P.S.: A core course offered in a discipline/subject may be treated as an elective by other discipline/subject and vice versa and such electives may also be referred to as Generic Elective.
- 3) **Ability Enhancement Courses (AEC):** The Ability Enhancement (AE) Courses may be of two kinds: Ability Enhancement Compulsory Courses (AECC) and Skill Enhancement Courses (SEC).
 - a. **Ability Enhancement Compulsory Courses (AECC):** Environmental Science, English Communication/MIL Communication.
 - b. **Skill Enhancement Courses (SEC):** These courses may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge.
- 4) **Dissertation/Project:** An elective course designed to acquire special/advanced knowledge, such as supplement study/support study to a project work, and a candidate studies such a course on his own with an advisory support by a teacher/faculty member is called dissertation/project.
- 5) **Graduate Requirement (GR) Courses:** These are courses on peripheral subjects in a programme, wherein completion of the course is considered mandatory to qualify for the award of the Degree.

P.S.: A core course offered in a discipline/subject may be treated as an elective by other discipline/subject and vice versa and such electives may also be referred to as a Generic Elective.

The Courses of the UG Programmes are further classified as follows:

- 1) **Program Core (Credit Courses):** Each academic programme is divided into Program Core or Common core courses which are further divided into mandatory and choice segments, with levels within them.

The Program Core courses are broadly categorized into Foundation, Electives and Interdisciplinary. Foundation, Elective and interdisciplinary courses are discipline specific or allied to the program. Foundation courses are mandatory courses that are offered through the period of study of the program. Foundation courses are offered as fundamental, intermediate and advanced courses based on the prerequisite and difficulty level (100 Level / 200 Level / 300 Level etc.) of the course. Elective courses are a basket of courses from which the student gets to choose. Elective courses are either specialization courses or generic courses. Elective courses include mini projects, dissertations, internships and capstone projects. Students also have the option to choose from a set of interdisciplinary courses which are varied from their discipline and offered by other Schools of Studies of the University.

Mandatory segments are those which lay a firm foundation of the knowledge required to complete a programme in the chosen domain, ending with a multifaceted assignment that serves as a culminating academic and intellectual experience for students, typically during their final year.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

- 2) **Common Core (Credit Courses):** Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

- 3) **Common Core (Non-credit Courses / Engagement) - Graduate Requirement (GR):** Engagements for this category do not carry any credit(s) but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree.

- 4) These shall be:
- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.
 - b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.
- 5) **Advanced Course:** Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.
- 6) **Prerequisite course:** Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline
- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.

- **500 Level Courses:** These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline.
- **600 Level Courses:** These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level.
- **700 Level Courses:** The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.

Seminars:

Some Programmes may prescribe Seminar as a requirement for the degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published technical literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.

Project Work/Dissertation and Summer Internship Program (SIP):

Project work/Dissertation and/or SIP is considered as a special course involving application of knowledge in solving / analyzing /exploring a real life situation/ difficult problem. A Project/Dissertation work may be given in lieu of a discipline specific elective paper. Summer Internship Program, wherever needed, may be introduced as a (or a part of) Project.

Audit Courses:

A student desirous of additional exposure to a course, without the rigors of obtaining a good grade, 'audits' a course. The minimum requirement of attendance for an 'Audit Course' is 75%, with any additional requirements as set by the instructor such as submission of assignments and minimum performance in some of the in-semester evaluations. Auditing of courses during regular semesters from 3rd semester onwards is permitted under the following conditions:

- 1) Students with CGPA > 6.0 will be permitted to 'Audit' a course. A course can be audited provided the course is offered in the semester as a credit course for others, and there is no slot clash. Prior permission of the Instructor is required.
- 2) Audit courses would be restricted to a maximum of two (2) courses per student in the entire period of the programme.
- 3) The instructor would award the 'AU' grade, if the attendance is satisfactory and additional requirements, as set out by the instructor, are met. If the attendance and performance is not satisfactory, the instructor will award 'No Grade'. The grade 'AU' does not carry any grade points and therefore does not figure in SGPA/ CGPA calculations.
- 4) The course successfully completed in Audit mode will be reflected in the Semester Grade Card, Grade Certificate and the Transcript as Audit Course.

A. Academic Audit: An Overview

The Academic Audit, like more traditional program reviews, is a peer review process that includes a **School of Studies Self-study** and a **site visit** by peers from within or outside the institution. Unlike the traditional approach to program evaluation, the academic audit process emphasizes **reflection** and **improvement** rather than compliance with predetermined standards. The purpose of an academic audit is to encourage Schools or departments or programs to evaluate their “**education quality processes**” – the key faculty and program activities required to produce, assure, and regularly improve the quality of teaching and learning. The academic audit process addresses how faculty members and Schools / departments / programs approach educational decision-making and how they organize their work, use the resources available to them, and work collegially to provide quality education in the best interests of the discipline and student learning.

The Academic Audit is a faculty driven model of ongoing self-reflection, peer feedback, collaboration and teamwork based on structured conversation to improve educational quality processes in teaching and learning and hence student success.

2. Examination :

2.1 Examination Calendar:

An Examination Calendar shall be prepared by Registrar (Evaluation) showing the schedule of various examinations to be conducted during a year based on the academic calendar.

2.2 Evaluation:

The Evaluation consists of two components viz., internal evaluation & term end/semester end evaluation as per the scheme of teaching & evaluation of the respective Schools of Studies. The internal component (formerly called as Continuous

Internal Assessment – CIA and now (with effect from 2017-18 Academic Year) it is termed as Continuous Internal Evaluation- CIE) is further divided into two sub – components called the Continuous & Comprehensive Evaluation (CCE) & Internal Assessment Test (IAT).

In School of Architecture, there is no IAT sub component in internal evaluation. The school has only the CCE component designed to evaluate students internally.

All the students are evaluated for total marks obtained in internal & semester end/term end examinations as approved in the scheme of teaching & evaluation of each school of studies & programme offered by the schools.

Thus the evaluation of a student is done based on the following:-

- A. Continuous Internal Evaluation (CIE).
 - a) Comprehensive & Continuous Evaluation (CCE).
 - b) Internal Assessment Test (IAT).

ie., CIE marks = CCE marks + IAT marks.
- B. Term End Examination (TEE) / Semester End Examination (SEE).
- C. Total Marks = CIE marks + (TEE/SEE) marks.

2.2.1 Comprehensive and Continuous Evaluation (CCE).

The comprehensive and continuous evaluation is carried out for all the students of UG, PG & Research Programme by the respective teaching faculty as per the programme structure and curriculum. The maximum weightage for CCE is 30 % of total marks for a course. In the absence of any SEE/TEE, the weightage shall be 100% of total marks for the course.

2.2.2 Internal Assessment Test (IAT).

Two tests at different point of time will be taken by the faculty in a trimester in all PG programme courses and the average of two test marks obtained will be considered as marks scored in IAT. The maximum weightage allotted to IAT marks is 20%.

In all UG programme, three tests will be conducted at different points of time in a semester and the average of best two scores will be considered as marks scored in IAT. The maximum weightage allotted is 20% of total marks for a course.

The number of tests to be carried out in a semester/trimester shall be guided by the regulations of the programme. (The number of tests to be conducted will be decided as per approved programme regulations from time to time.)

2.2.3 Term End Examination (TEE)/Semester End Examination(SEE).

At the end of each semester/ trimester, a semester/ term end examination will be conducted covering the entire syllabus of the semester/ trimester. The Weightage allotted to SEE /TEE marks is 50 % of total marks for a course. This may not be applicable if the evaluation of a course in a particular school is designed based only on continuous & comprehensive evaluation (CCE) as per the scheme of teaching & evaluation.

2.2.4 Practical Examinations:

The practical examinations including project evaluation, viva voce etc., wherever applicable will be conducted before or after the term end examinations (TEE/SEE). The Director / Dean of the Schools of Studies concerned shall submit a proposal to Registrar (Evaluation) at least 15 days before commencement of such examinations. The Weightage of the practical examination is as per the scheme of teaching and evaluation and regulations approved.

2.2.5 Project Work/dissertation:

Project Work/dissertation may be offered as per the schemes prescribed in respective programmes. It shall be evaluated by two examiners, one external and one internal as suggested by the Dean/Director of the School & approved by the Registrar (Evaluation). For research programmes, the pre-colloquium & final viva shall be conducted by the board of examiners approved by the Vice Chancellor as per the regulations for School of Research and innovation.

3.0 Types of Examinations

The following examinations shall be conducted for UG, PG and Research programmes in the University:-

3.0.1 Semester/Term End Examination (SEE/TEE):

Semester/Term End examinations are conducted at the end of each semester or trimester for the regular students of the UG, PG & Research programmes and provisional tabulation of results shall be announced. The answer scripts shall undergo valuation first by an examiner selected from among the list of examiners approved by BOS & forwarded by the Dean/ Director of concerned school. Such valued scripts shall be reviewed by one of the senior faculty from among the list of examiners approved by BOS & forwarded by Dean/ Director of concerned school. The reviewer shall carry out second valuation of 20% of total number of scripts and check the remaining 80% of answer scripts for total, completion of valuation etc.

The marks awarded by reviewer shall be considered as the marks obtained by the student in that particular course and the provisional tabulation of result shall be published.

If the marks awarded by Valuer & reviewer differs by 15% or more, then the answer scripts shall be subjected to board valuation. Marks awarded in the board valuation shall be final.

The students are allowed to apply for revaluation after the announcement of the provisional SEE/TEE results if they feel that the marks obtained are not as per their expectations. The students shall apply online for photocopy of the answer booklet as a first step for revaluation by paying the fee for photocopy. After perusing the photocopy collected, the student may get a faculty/a well wisher to advise him whether he should go in for revaluation or not. If he decides to seek revaluation, he may apply for the same online by registering for the same with the fee notified. This applies to all the programmes conducted in the University viz., PG/UG/Research.

The marks advantageous to a student after revaluation will be published and updated in the concerned examination result tabulation.

If the marks obtained after revaluation by a student differs by 15% or more, the revaluation fee will be refunded to the student and the faculty who undervalued/did not value the answer script properly may be asked to bear the same.

3.0.2 Makeup Examination:

Those students who have not passed in one or more courses in TEE/SEE are eligible to write the makeup examination which will be offered after every TEE/SEE in both ODD & EVEN semesters (However, no makeup examination will be conducted after the SEE in a summer term).

Only those students who have appeared in regular exams and have failed are allowed to appear in the makeup examination. Apart from the above category of students, the students who fulfill the following condition will also be allowed to write the makeup examination:-

“ If a student has satisfactory attendance in a course/s and has secured a minimum of 50% in CIE in that course/s, but could not appear in TEE/SEE for valid and convincing reasons, shall be eligible to appear for the make-up examination , after due approval from the Vice Chancellor.”

All such cases will be put up to the Vice Chancellor by concerned Dean/Director of Schools of Studies with relevant supporting documents through the Registrar(evaluation) for his consideration & approval.

If a student obtains less than the pass marks in the makeup examination in the course/ courses in which he has appeared, there will be no change in his/ her TEE/SEE results. If a student obtains a pass in the course/ courses in the makeup examination, the marks obtained will be replaced in the TEE/SEE results and accordingly the result will be republished. There will be no provision of revaluation in the makeup examination.

- a. Semester Grade Point Average (SGPA) is awarded at the end of each semester on passing all the courses offered in that semester. The SGPA is the ratio of sum of the product of the number of credits with the grade points secured by a student in all the courses taken by him and the sum of the number of credits of all the courses undergone by a student in that semester.

$$\text{Thus, SGPA, } S_n = \frac{\sum (C_i \times G_i)}{\sum C_i}$$

Where S_n is the SGPA of the n^{th} semester, C_i is the number of credits of the i^{th} course and G_i is the grade point scored by the student in the i^{th} course.

- b. Cumulative Grade Point Average (CGPA) is awarded on successful completion of each semester (2nd Semester onwards) to indicate the progress of the student. The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters undergone by the student.

$$\text{CGPA} = \frac{\sum (C_n \times S_n)}{\sum C_n}$$

Where S_n is the SGPA of the n^{th} semester and C_n is the total number of credits in that semester. Finally the SGPA and CGPA shall be rounded off to 2 decimal places.

3.2.3 Award of Class to a student on completion of a programme.

Under Semester Scheme:-

UG Programmes:-

Class is awarded to the student on successful completion of a Semester/Programme, as per table given below:-

SGPA/CGPA	Class	Abbreviation

≥ 7.50 and ≤ 10.00	First Class with Distinction	FCD
≥ 6.00 and < 7.50	First Class	FC
≥ 5.00 and < 6.00	Second Class	SC

Under CBSS :-

Conversion of Grade and Percentage of Marks:

Conversion formula for the conversion of CGPA into percentage is:

Percentage of marks scored, $P = [CGPA \text{ earned} - 0.75] \times 10$

Class Declaration:

After the conversion of final CGPA into percentage of marks (P), a graduating student is declared to have obtained class as per table given below:-

Percentage of Marks	Class	Abbreviation
$\geq 70\%$	First Class with Distinction	FCD
$\geq 60\%$ and $< 70\%$	First Class	FC
$\geq 50\%$ and $< 60\%$	Second Class	SC
$\geq 42.5\%$ and $< 50\%$	Pass Class	PC

3.2.4 Maximum duration of the programme.

22BSOD3.5
Courses:

There will be following types of courses in a B. Arch. programme, namely:

- 1) Professional Core (PC) Course: A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.
- 2) Elective Course: Generally a course which can be chosen from a pool of courses and are of two types: a) Professional Elective (PE) which may be very specific or specialized or advanced or supportive to the discipline/ subject of study or which provides an extended scope b) Open Elective (OE) which enables an exposure to some other discipline/subject/domain or nurtures the candidate's proficiency/skill
- 3) Professional Ability Enhancement Courses (PAEC) which may be of two kinds: Professional Ability Enhancement Compulsory Courses (PAECC) and Skill Enhancement Courses (SEC)
- 4) Graduate Requirement (GR) Courses: These are courses on peripheral subjects in a programme, wherein completion of the course is considered mandatory to qualify for the award of the Degree.

The Courses of the B.Des. Programme are further classified as follows:

- 1) Program Core (Credit Courses):** Each academic programme is divided into Program Core or Common core courses which are further divided into mandatory and choice segments, with levels within them.

The Program Core courses are broadly categorized into Foundation, Electives and Interdisciplinary.

Foundation, Elective and interdisciplinary courses are discipline specific or allied to the program. Foundation courses are mandatory courses that are offered through the period of study of the program. Foundation courses are offered as fundamental, intermediate and advanced courses based on the prerequisite and difficulty level (100 Level / 200 Level / 300 Level etc.) of the course. Elective courses are a basket of courses from which the student gets to choose. Elective courses are either specialization courses or generic courses. Elective courses include mini projects, dissertations, internships and capstone projects. Students also have the option to choose from a set of interdisciplinary courses which are varied from their discipline and offered by other Schools of Studies of the University.

Mandatory segments are those which lay a firm foundation of the knowledge required to complete a programme in the chosen domain, ending with a multifaceted assignment that serves as a culminating academic and intellectual experience for students, typically during their final year.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

2) Common Core (Credit Courses): Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

3) Common Core (Non-credit Courses / Engagement) - Graduate Requirement (GR): Engagements for this category do not carry any credit(s) but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree. These shall be:

- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.
- b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.

4) Advanced Course: Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.

5) Prerequisite course: Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline
- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.
- **500 Level Courses:** These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline.

	<ul style="list-style-type: none"> • 600 Level Courses: These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level. • 700 Level Courses: The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.
22BSOD3.6	<p>Seminars:</p> <p>Some Programmes may prescribe Seminar as a requirement for the B.Des.. degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published technical literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.</p>
22BSOD3.7	<p>Projects:</p> <p>Programmes prescribe project as a requirement for the degree, wherein under the guidance of a Faculty member, a student is required to do some applied, creative and original work, based on the application of knowledge gained while undergoing various courses in the earlier years. The student is expected to do a survey of literature in the subject, work out a project plan and carry it out through experimentation and/ or modeling/ computation. Through the project work the student has to exhibit skills for analysis, design and synthesis. The details of the project requirements shall be as per the prescribed project guidelines.</p>
22BSOD3.8	<p>Audit Courses:</p> <p>A student desirous of additional exposure to a course, without the rigors of obtaining a good grade, ‘audits’ a course. The minimum requirement of attendance for an ‘Audit Course’ is 75%, with any additional requirements as set by the instructor such as submission of assignments and minimum performance in some of the in-semester</p>

	<p>evaluations. Based on the number of credits for a course and obtained Grade Point for that course in a Semester, the GPA is calculated as given below: <ol style="list-style-type: none"> a) The SGPA is the ratio of sum of the product of the number of credits with the grade points secured by a student in all the courses taken by him to the sum of the number of credits of all the courses undergone by a student, i.e., $SGPA = \frac{\sum (C_i \times G_i)}{\sum C_i}$ Where C_i is the number of credits of the i^{th} course and G_i is the grade point scored by the student in the i^{th} course.

	<p>b) The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.,</p> $CGPA = \frac{\sum (C_n \times S_n)}{\sum C_n}$ <p>Where S_n is the SGPA of the n^{th} semester and C_n is the total number of credits in that semester.</p> <p>Finally the SGPA and CGPA shall be rounded off to 2 decimal places.</p>
22BSOD8.2	<p>Passing Standards:</p> <ol style="list-style-type: none"> 1) A student shall be declared successful or 'passed' in a semester, only when he gets a SGPA of 4.00 earning credits as per the scheme of teaching and evaluation, with grade point of 4 or more in every registered course. 2) A student shall be declared successful or 'passed' in the entire Under Graduate programme, only when he gets a minimum CGPA of 4.00 and has completed all the graduate requirement courses as mandated in the scheme of teaching and evaluation.
22BSOD 8.3	<p>1) Conversion of Grade and Percentage of Marks:</p> <p>Conversion formula for the conversion of CGPA into Percentage is:</p> <p>Percentage of marks scored, $P = [CGPA \text{ earned}] \times 10$</p> <p>2) Class Declaration:</p> <p>After the conversion of final CGPA into Percentage of Marks (PM), a graduating student is declared to have passed in:</p> <ol style="list-style-type: none"> a) First Class with Distinction (FCD): $PM \geq 75\%$ (In First Attempt) b) First Class (FC): $60\% \leq PM < 75\%$ c) Second Class (SC): $50\% \leq PM < 60\%$ d) Pass Class (P): $40\% \leq PM < 50\%$
22BSOD8.4	<p>Grade Cards, Certificates and Transcripts:</p> <ol style="list-style-type: none"> 1) Grade Cards: At the end of each semester, a Grade Card shall be issued to all the registered students of that semester, indicating the Course code, Title, Number of credits, Letter grade awarded and Credits earned, for all the Courses as specified in the scheme of teaching and evaluation. This may have F-RA or F-RR grades awarded to the student. 2) Grade Certificate: On successful completion of all courses/earning credits, specified in a semester, the grade certificate is issued indicating the course details along with SGPA of that semester and also CGPA earned till that semester.

	<p>3) Transcripts: Transcript is the consolidated statement of the academic performance of a student for all the semesters since joining the programme and is generally given to a student on successful completion of the programme along with the degree certificate.</p> <p>a) For those students who have taken multiple attempts to clear a course, the transcript given on successful completion of the programme will only contain earned pass grade (O to P and AU); the courses cleared subsequently will however be shown in the respective semester with Month and Year in which the student has finally cleared the course. The transcript will show only the overall CGPA based on all the courses taken by the student. Credits earned beyond the requirement for the award of the degree shall be shown as additional courses separately, indicating the grade earned by the student. Additional copies of the transcript can be obtained if needed, on request submitted along with payment of applicable fee.</p> <p>b) Students who have not yet completed the programme can obtain an interim Transcript at the end of any semester, if needed, on request and upon payment of applicable fee. The interim Transcript includes failed courses, which have not been cleared at the time of issue.</p>

17BSET3.0	CHOICE BASED CREDIT SYSTEM AND ACADEMIC PROCESS
17BSET3.1	<p>Odd & Even Semesters and Summer Term:</p> <p>The University follows the Choice Based Credit System and the Semester Scheme. There are two regular semesters and one additional term in an academic year. The semester that begins in August (August to November/ December) is known as the Odd Semester and the semester that begins in January (January to April/ May) is known as the Even Semester. During the summer vacation (i.e., May/ June to July), the Summer term is conducted to offer courses as per 17BSET 3.2.</p>
17BSET3.2	<p>Summer Term:</p> <p>The summer Term is an additional term conducted during an academic year. During summer term, a limited number of courses may be offered to enable the students to clear their backlog courses (F-RR) and/ or register for additional regular credit courses on audit basis, subject to strict adherence to the following guidelines:</p> <ol style="list-style-type: none"> 1) The Programme Council shall identify the courses to be offered along with the Course Instructor and recommend offering of such summer course(s) to the Dean for consideration. The identified faculty members shall offer the courses only on approval by the Dean. 2) The course is offered in the same manner as a regular semester course without compromising the course requirements in terms of knowledge delivery, course work, assessment and evaluation. The University shall notify the fee payable by the students for the summer term courses. 3) The duration of the course is six to eight weeks. The registration, examination, assessment and grading etc. are done in the same way as is done for regular semester courses. The total number of contact hours for the courses remain the same as that during the regular semesters, and therefore, the courses are run at an accelerated pace. The Academic Calendar specially made in this connection shall be strictly followed. 4) The dropping of a Summer Course is permitted within 7 days from the first lecture of the course. However, the registration fee paid for the course is not refundable. 5) Time slots will be assigned and notified by the Dean as done for the regular semester courses

	<p>7) A notified summer course can be withdrawn if the number of students registered for the course is less than five.</p> <p>8) A student can register up to a maximum of 12 credits or 3 courses in any summer term, depending on his academic standing.</p> <p>9) Courses offered in a summer term will be treated as equivalent to a regular semester courses for all accounting purposes.</p>
17BSET3.3	<p>Curriculum:</p> <p>Every Programme has a prescribed course structure which, in general terms, is known as the Curriculum or the Courses of Study or the Scheme of Teaching and Evaluation. It prescribes all the courses/ laboratory/ other requirements for the degree and sets out the nominal sequence semester wise.</p> <p>It provides the syllabus and a list of text/ reference books (or other learning material sources) for each course. The Courses of Study details are updated every semester and are made available at the University website: http://cmru.edu.in</p> <p>Curriculum may also include SWAYAM and Massive Open Online Courses (MOOCs), offered by premier institutions. However, selection of such courses, if any, shall always be within prescribed guidelines of the relevant regulatory bodies.</p>
17BSET3.4	<p>Course Credit Structure:</p> <p>1) A certain quantum of academic work, measured in terms of credits, is laid down as the requirement for completion of B. Tech degree in the different available specialization areas. A student earns credits by satisfactorily completing courses/other academic activities every semester.</p> <p>2) The credits are distributed semester wise, as prescribed in the Scheme of Teaching and Evaluation for each of the programmes. The courses generally progress in sequences, building competencies as per the course learning outcomes. The positioning of a course indicates certain academic maturity on the part of the students.</p>

	<p>3) Some courses do, in addition, specify passing in other courses, offered earlier in the programmes, as prerequisites for the course.</p> <p>4) Students are required to follow the semester wise schedule of courses specified in Scheme of Teaching and Evaluation; they do, however, have freedom to follow alternative schedules to optimize their academic profile with additional courses, keeping the requirements for each course in mind. These additional courses may be from the prescribed scheme of teaching and evaluation or the courses offered under other programmes. Credits earned beyond the requirement for the award of the degree shall be treated as additional credits. For students with backlog courses, such rescheduling may even become necessary. Such departures from suggested schedules need to be done very carefully, and always with advice from the Faculty Adviser.</p>
17BSET3.5	<p>Courses:</p> <p>There will be following types of courses in a B. Tech. programme, namely:</p> <ol style="list-style-type: none"> 1) Humanities and Social Sciences (HS), include Management, Skill enhancement and Economics. These courses will have 1 to 3 credits per course. 2) Basic Sciences (BS) include Mathematics, Physics and Chemistry. These courses will have 2 to 4 credits per course. 3) Engineering Sciences (ES) are engineering foundation courses and include Workshop, Drawing, Basics of Electrical/ Civil/ Mechanical/ Computer Engineering, Materials, and Instrumentation. These courses are common across all disciplines and will have 2 to 4 credits per course. 4) Professional Core Courses (PC): These are the courses to be compulsorily studied by a student as a core requirement to complete the requirements of a program in a said discipline of study. These courses will have 2 to 4 credits per course. 5) Professional Elective Courses (PE): These are the courses from which a student can choose and study as part of the requirement to complete the program in a said discipline of study. These courses will have 2 to 4 credits per course. 6) Open Elective Courses (OE): These courses are supportive to the discipline/ providing extended scope/enabling an exposure to some other discipline/ domain and they are chosen from the pool of courses. These courses may have 2 to 4 credits per course. 7) Skill development Courses (SD): These are to nurture student proficiency skills. These courses are offered to achieve the programme outcomes not specifically covered by the other courses and may have 1 to 3 credits per course.

8) Graduate Requirement (GR) Courses: These are courses on peripheral subjects in a programme, wherein completion of the course is considered mandatory to qualify for the award of the Degree.

9) Project work, Mini Project work and Internship and Seminar are also considered as courses in the B.Tech.. programme.

The Courses of the B.Tech. Programme are further classified as follows:

1) Program Core (Credit Courses): Each academic programme is divided into Program Core or Common core courses which are further divided into mandatory and choice segments, with levels within them.

The Program Core courses are broadly categorized into Foundation, Electives and Interdisciplinary.

Foundation, Elective and interdisciplinary courses are discipline specific or allied to the program. Foundation courses are mandatory courses that are offered through the period of study of the program. Foundation courses are offered as fundamental, intermediate and advanced courses based on the prerequisite and difficulty level (100 Level / 200 Level / 300 Level etc.) of the course. Elective courses are a basket of courses from which the student gets to choose. Elective courses are either specialization courses or generic courses. Elective courses include mini projects, dissertations, internships and capstone projects. Students also have the option to choose from a set of interdisciplinary courses which are varied from their discipline and offered by other Schools of Studies of the University.

Mandatory segments are those which lay a firm foundation of the knowledge required to complete a programme in the chosen domain, ending with a multifaceted assignment that serves as a culminating academic and intellectual experience for students, typically during their final year.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

2) Common Core (Credit Courses): Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their

coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

3) Common Core (Non-credit Courses / Engagement) - Graduate Requirement

(GR): Engagements for this category do not carry any credit(s) but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree. These shall be:

- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.
 - b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.
- 4) Advanced Course:** Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.
- 5) Prerequisite course:** Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline
- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.
- **500 Level Courses:** These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline.
- **600 Level Courses:** These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level.
- **700 Level Courses:** The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.

17BSET3.6	<p>Seminars:</p> <p>Some Programmes may prescribe Seminar as a requirement for the B.Tech.. degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published technical literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.</p>
17BSET3.7	<p>Projects:</p> <p>Programmes prescribe project as a requirement for the degree, wherein under the guidance of a Faculty member, a student is required to do some applied, creative and original work, based on the application of knowledge gained while undergoing various courses in the earlier years. The student is expected to do a survey of literature in the subject, work out a project plan and carry it out through experimentation and/ or modeling/ computation. Through the project work the student has to exhibit skills for analysis, design and synthesis. These projects may be offered as a single unit of 16 credits or two modules of 4 and 12 credits in two successive semesters. However, CGPA is calculated at the end of each semester from the second semester onwards and reflected in the grade certificate for indicating the progress of the student.

	<p>2) Each course in a program is associated with number of credits. Based on the number of credits for a course and obtained Grade Point for that course in a Semester, the GPA is calculated as given below:</p> <p>a) The SGPA is the ratio of sum of the product of the number of credits with the grade points secured by a student in all the courses taken by him to the sum of the number of credits of all the courses undergone by a student, i.e.,</p> $SGPA = \sum (C_i \times G_i) / \sum C_i$ <p>Where C_i is the number of credits of the i^{th} course and G_i is the grade point scored by the student in the i^{th} course.</p>
	<p>b) The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.,</p> $CGPA = \sum (C_n \times S_n) / \sum C_n$ <p>Where S_n is the SGPA of the n^{th} semester and C_n is the total number of credits in that semester.</p> <p>Finally the SGPA and CGPA shall be rounded off to 2 decimal places.</p>

17UGLH 3.4	<p>Course Credit Structure:</p> <ol style="list-style-type: none"> 1) A certain quantum of academic work, measured in terms of credits, is laid down as the requirement for completion of degree in the different programmes and the available specialization areas. A student earns credits by satisfactorily completing courses/other academic activities every semester. 2) The credits are distributed semester wise, as prescribed in the Scheme of Teaching and Evaluation for each of the programmes. The courses generally progress in sequences, building competencies as per the course learning outcomes. The positioning of a course indicates certain academic maturity on the part of the students.

	<p>3) Some courses do, in addition, specify passing in other courses, offered earlier in the programmes, as prerequisites for the course.</p> <p>4) Students are required to follow the semester wise schedule of courses specified in Scheme of Teaching and Evaluation; they do, however, have freedom to follow alternative schedules to optimize their academic profile with additional courses, keeping the requirements for each course in mind. Such departures from suggested schedules need to be done very carefully, and always with advice from the Faculty Adviser.</p>
17UGLH 3.5	<p>Courses:</p> <p>There will be following types of courses in a programme, namely:</p> <ol style="list-style-type: none"> 1) Core Course: A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course. 2) Elective Course: Generally a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/ subject of study or which provides an extended scope or which enables an exposure to some other discipline/subject/domain or nurtures the candidate's proficiency/skill is called an Elective Course. 3) Compulsory Foundation Course: Compulsory foundation courses are chosen by the university from the list of subjects prescribed by the Bar Council of India and shall be mandatory for the students to undertake. 4) Core Language Course: A course, which should compulsorily be studied by a candidate as a language requirement is termed as a Core language course. 5) Compulsory Clinical Course: Clinical courses are prescribed by the Bar Council of India and shall be mandatory for the students to undertake. 6) Ability Enhancement Courses (AEC): AEC courses are the courses based upon the content that leads to Knowledge enhancement. 7) Skill Enhancement Courses (SEC): SEC courses are value-based and/or skill-based and are aimed at providing hands-on-training, competencies, skills, etc. These courses may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge. 8) Graduate Requirement (GR) Courses: These are courses on peripheral subjects in a programme, wherein completion of the course is considered mandatory to qualify for the award of the Degree.

The Courses of the UG Law Programmes are further classified as follows:

1) Program Core (Credit Courses): Each academic programme is divided into Program Core or Common core courses which are further divided into mandatory and choice segments, with levels within them.

The Program Core courses are broadly categorized into Foundation, Electives and Interdisciplinary.

Foundation, Elective and interdisciplinary courses are discipline specific or allied to the program. Foundation courses are mandatory courses that are offered through the period of study of the program. Foundation courses are offered as fundamental, intermediate and advanced courses based on the prerequisite and difficulty level (100 Level / 200 Level / 300 Level etc.) of the course. Elective courses are a basket of courses from which the student gets to choose. Elective courses are either specialization courses or generic courses. Elective courses include mini projects, dissertations, internships and capstone projects. Students also have the option to choose from a set of interdisciplinary courses which are varied from their discipline and offered by other Schools of Studies of the University.

Mandatory segments are those which lay a firm foundation of the knowledge required to complete a programme in the chosen domain, ending with a multifaceted assignment that serves as a culminating academic and intellectual experience for students, typically during their final year.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

2) Common Core (Credit Courses): Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

3) Common Core (Non-credit Courses / Engagement) - Graduate Requirement (GR): Engagements for this category do not carry any credit(s)

but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree. These shall be:

- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.
- b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.

4) Advanced Course: Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.

5) Prerequisite course: Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline

- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.
- **500 Level Courses:** These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline.
- **600 Level Courses:** These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level.
- **700 Level Courses:** The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.

17UGLH 3.6	<p>Seminars: Some Programmes may prescribe Seminar as a requirement for the degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published legal literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.</p>

	<p>b) The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.,</p> $CGPA = \frac{\sum (C_n \times S_n)}{\sum C_n}$ <p>Where S_n is the SGPA of the n^{th} semester and C_n is the total number of credits in that semester.</p> <p>Finally the SGPA and CGPA shall be rounded off to 2 decimal places.</p>

17UGBD 3.4	<p>Course Credit Structure:</p> <ol style="list-style-type: none"> 1) A certain quantum of academic work, measured in terms of credits, is laid down as the requirement for completion of degree in the different programme and the available specialization areas. A student earns credits by satisfactorily completing courses/ other academic activities every semester. 2) The credits are distributed semester wise, as prescribed in the Scheme of Teaching and Evaluation for each of the programmes. The courses generally progress in sequences, building competencies as per the course learning outcomes. The positioning of a course indicates certain academic maturity on the part of the students. 3) Some courses do, in addition, specify passing in other courses, offered earlier in the programmes, as prerequisites for the course. 4) Students are required to follow the semester wise schedule of courses specified in Scheme of Teaching and Evaluation; they do, however, have freedom to follow alternative schedules to optimize their academic profile with additional courses, keeping the requirements for each course in mind. For students with backlog courses, such rescheduling may even become necessary. Such departures from suggested schedules need to be done very carefully, and always with advice from the Faculty Adviser.

17UGBD 3.5	<p>Courses:</p> <p>There will be following types of courses in a programme, namely:</p> <ol style="list-style-type: none"> 1) Core Course: A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course. 2) Elective Course: Generally a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/ subject of study or which provides an extended scope or which enables an exposure to some other discipline/subject/domain or nurtures the candidate's proficiency/skill is called an Elective Course. <ol style="list-style-type: none"> a) Discipline Specific Elective (DSE) Course: Elective courses may be offered by the main discipline/ subject of study is referred to as Discipline Specific Elective. P.S.: A core course offered in a discipline/subject may be treated as an elective by other discipline/subject and vice versa and such electives may also be referred to as Generic Elective. 3) Ability Enhancement Courses (AEC): The Ability Enhancement (AE) Courses may be of two kinds: Ability Enhancement Compulsory Courses (AECC) and Skill Enhancement Courses (SEC). <ol style="list-style-type: none"> a. Ability Enhancement Compulsory Courses (AECC): Environmental Science, English Communication/MIL Communication. b. Skill Enhancement Courses (SEC): These courses may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge. 4) Dissertation/Project: An elective course designed to acquire special/advanced knowledge, such as supplement study/support study to a project work, and a candidate studies such a course on his own with an advisory support by a teacher/faculty member is called dissertation/project. 5) Graduate Requirement (GR) Courses: These are courses on peripheral subjects in a programme, wherein completion of the course is considered mandatory to qualify for the award of the Degree. <p>P.S.: A core course offered in a discipline/subject may be treated as an elective by other discipline/subject and vice versa and such electives may also be referred to as a Generic Elective.</p>
-------------------	---

The Courses of the UG Programmes are further classified as follows:

1) Program Core (Credit Courses): Each academic programme is divided into Program Core or Common core courses which are further divided into mandatory and choice segments, with levels within them.

The Program Core courses are broadly categorized into Foundation, Electives and Interdisciplinary.

Foundation, Elective and interdisciplinary courses are discipline specific or allied to the program. Foundation courses are mandatory courses that are offered through the period of study of the program. Foundation courses are offered as fundamental, intermediate and advanced courses based on the prerequisite and difficulty level (100 Level / 200 Level / 300 Level etc.) of the course. Elective courses are a basket of courses from which the student gets to choose. Elective courses are either specialization courses or generic courses. Elective courses include mini projects, dissertations, internships and capstone projects. Students also have the option to choose from a set of interdisciplinary courses which are varied from their discipline and offered by other Schools of Studies of the University.

Mandatory segments are those which lay a firm foundation of the knowledge required to complete a programme in the chosen domain, ending with a multifaceted assignment that serves as a culminating academic and intellectual experience for students, typically during their final year.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

2) Common Core (Credit Courses): Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

3) Common Core (Non-credit Courses / Engagement) - Graduate Requirement

(GR): Engagements for this category do not carry any credit(s) but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree. These shall be:

- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.
- b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.

4) Advanced Course: Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.

5) Prerequisite course: Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline

- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.
- **500 Level Courses:** These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline.
- **600 Level Courses:** These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level.
- **700 Level Courses:** The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.

17UGBD 3.6	<p>Seminars:</p> <p>Some Programmes may prescribe Seminar as a requirement for the degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published technical literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.</p>
17UGBD 3.7	<p>Project Work/Dissertation and Summer Internship Program (SIP):</p> <p>Project work/Dissertation and/or SIP is considered as a special course involving application of knowledge in solving / analyzing /exploring a real life situation/ difficult problem. A Project/Dissertation work may be given in lieu of a discipline specific elective paper. Summer Internship Program, wherever needed, may be introduced as a (or a part of) Project.</p>
17UGBD 3.8	<p>Audit Courses:</p> <p>A student desirous of additional exposure to a course, without the rigors of obtaining a good grade, 'audits' a course. The minimum requirement of attendance for an 'Audit Course' is 75%, with any additional requirements as set by the instructor such as submission of assignments and minimum performance in some of the in-semester evaluations. Auditing of courses during regular semesters from 3rd semester onwards is permitted under the following conditions:</p> <ol style="list-style-type: none"> 1) Students with CGPA > 6.0 will be permitted to 'Audit' a course. A course can be audited provided the course is offered in the semester as a credit course for others, and there is no slot clash. Prior permission of the Instructor is required. 2) Audit courses would be restricted to a maximum of two (2) courses per student in the entire period of the programme. 3) The instructor would award the 'AU' grade, if the attendance is satisfactory and additional requirements, as set out by the instructor, are met. If the attendance and performance is not satisfactory, the instructor will award 'No Grade'. The grade 'AU' does not carry any grade points and therefore does not figure in SGPA/ CGPA calculations. 4) The course successfully completed in Audit mode will be reflected in the Semester Grade Card, Grade Certificate and the Transcript as Audit Course.

17UGBD 3.9	<p>Registration:</p> <p>It is mandatory for every student to register for a semester to attend various courses/ earn credits, using the prescribed Course Registration Form (CRF), till he completes his programme. The registration shall be completed on or before the prescribed last date for registration announced in the academic calendar.</p> <ol style="list-style-type: none"> 1) On joining the Programme, each student is assigned to a Faculty Adviser or an Advisory group. A student shall register for required courses each semester with prior permission of the Faculty Adviser. 2) The student can register for courses he intends to take during a given semester (including courses in summer semester) on the basis of his plan for each Programme, as given in the Scheme of Teaching and Evaluation and as per the advice given by his Faculty Adviser. 3) The Faculty Adviser is expected to discuss with the student his academic performance during the previous semesters and then decide the number and nature of the courses for which the student can register during the semester within the framework of the Regulations. 4) The Faculty Adviser may advise the student to drop one or more courses/activities based on his academic performance. The Faculty Adviser may even advise a reduced load program over several semesters for students with poor performance at the end of the first semester/year. 5) Students are not permitted to reregister for course/(s), which they have already passed. 6) The registration is deemed to be complete only on approval by the Dean. 7) Without registration, any academic activity (course/seminar etc.) undergone by a student will not be counted towards the requirements of his degree. 8) Students having outstanding dues to the University or a hostel shall not be permitted to register.

However, Honors degree students can register for a minimum of 20 credits and a maximum of 38 credits.</p> <p>2) Registration for second and subsequent semesters:</p> <p>a) From second semester onwards, registration is dependent on the academic standing of the student. A student with a low academic standing registers for the academic load specified by the Faculty Adviser. In addition he may add one more course (3-5 credits) towards additional learning or to clear backlog courses, without this being considered an overload.</p> <p>b) Students with average academic standing are advised not to attempt full load. Faculty Advisers after careful scrutiny will advise reduced loads depending on previous performance.</p> <p>3) Late Registration:</p> <p>Registration beyond the last date may be permitted only in special cases till the date specified in the Academic Calendar, on payment of a late registration fee.</p>
17UGBD 3.11	<p>Registration for Graduate Requirement (GR) Courses:</p> <p>Graduate Requirement (GR) courses which are mandatory Non-credit courses are treated as complete or incomplete subject to the fulfillment of the minimum requirements of these courses and a minimum of 75% attendance. The award of degree is subject to successful completion of these courses. Formal registration for these courses shall be done along with other courses, at the beginning of the semesters.</p> <p>Not satisfying the minimum requirements of the course will result in a F-RR grade and the student has to re- register for the course when offered next. This requirement must be completed before the end of the Programme.</p>
17UGBD 3.12	<p>Registration for Summer Semester Courses</p> <p>Students are permitted to register for courses during summer semester under the regulation specified by 17UGBD 3.2, on payment of prescribed registration and course fees.</p>
17UGBD 3.13	<p>Course Adjustment/Dropping of Courses:</p> <p>1) The Academic Calendar sets a date, normally two weeks after the commencement of the semester, for Course Adjustment. Course adjustment has to be</p>

	<p>done in consultation with the Faculty Adviser. When the need for course adjustment through addition, substitution or dropping of course/s arises, the student without any backlog should do online course adjustment and students with backlog course/s should do it manually by filling a Course Adjustment Form (CAF). CAF has to be signed by both the student and the Faculty Adviser and the same is to be submitted to the Dean.</p> <p>2) If in the second or any of the subsequent semesters, a student finds his academic load too heavy, he may drop one or two courses out of the registered ones on advice from the Faculty Adviser, provided the minimum credit requirements is fulfilled. The last date for doing this is within 10 days after the end of the first test, or as specified in the Academic Calendar.</p> <p>3) Course/s dropped by a student may be taken during a subsequent semester including the summer semester, if offered.</p> <p>4) The minimum number of students to be registered for an Elective to be offered shall be not less than ten, or as decided by the University.</p>

It prescribes all the courses/ laboratory/ other requirements for the degree and sets out the nominal sequence semester wise. It also provides the syllabus and a list of text/ reference books (or other learning material sources) for each course. 2) The University shall not only lay down the syllabus for each course, but also the manner of its implementation, namely, through lectures, tutorials, laboratory sessions, seminars, field work, projects and such other activities. 3) The Courses of Study details are updated every semester and are made available at the School's page of the University website: http://www.cmr.edu.in/. 4) Curriculum may also include SWAYAM or Massive Open Online Courses (MOOCs), offered by premier Institutions worldwide. However, selection of SWAYAM or MOOCs, if any, shall always be within prescribed guidelines of the relevant regulatory bodies. 5) Specializations offered, wherever applicable, will be as prescribed in Scheme of Teaching and Evaluation.

<p>17PGMD 3.4</p>	<p>Course Credit Structure:</p> <ol style="list-style-type: none"> 1) A certain quantum of academic work, measured in terms of credits, is laid down as the requirement for completion of degree in the different programme and the available specialization areas. A student earns credits by satisfactorily completing courses/ other academic activities every semester. 2) The credits are distributed semester wise, as prescribed in the Scheme of Teaching and Evaluation for each of the programmes. The courses generally progress in sequences, building competencies as per the course learning outcomes. The positioning of a course indicates certain academic maturity on the part of the students. 3) Some courses do, in addition, specify passing in other courses, offered earlier in the programmes as prerequisites for the course. 4) Students are required to follow the semester wise schedule of courses specified in Scheme of Teaching and Evaluation; they do, however, have freedom to follow alternative schedules to optimize their academic profile with additional courses, keeping the requirements for each course in mind. For students with backlog courses, such rescheduling may even become necessary. Such departures from suggested schedules need to be done very carefully, and always with advice from the Faculty Adviser.
<p>17PGMD 3.5</p>	<p>Courses:</p> <p>There will be following types of courses in a programme, namely:</p> <ol style="list-style-type: none"> 1) Core Courses (CC): Essential courses, which are considered to be useful for all students of the programme, irrespective of their choice of elective group/ specialization. 2) Core Elective (CE): including additional knowledge and skill courses, considered to be useful for developing additional skills/ competencies, irrespective of elective group/ specialization. 3) Elective Courses (EC): including knowledge and skill courses focusing on function/ sector specific skills/ competencies leading to focused study in an elective group/ specialization area. 4) Project work/ Internship/ Seminars/ Dissertations can also be offered as independent course in the programme subject to allocation of required credit hour allocation to the course. The requirements for Seminar/ Project/Internship/ Dissertation based courses will, be as specified in the course-guidelines / details approved by the Board of the Studies of the School. 5) Graduate Requirement (GR) Courses: These are courses on peripheral subjects in a programme, wherein completion of the course is considered mandatory to qualify for the award of the Degree.

6) Project work, Mini Project work and Internship and Seminar are also considered as courses in the programme.

The Courses of the Programme are further classified as follows:

1) Program Core (Credit Courses): Each academic programme is divided into Program Core or Common core courses which are further divided into mandatory and choice segments, with levels within them.

The Program Core courses are broadly categorized into Foundation, Electives and Interdisciplinary.

Foundation, Elective and interdisciplinary courses are discipline specific or allied to the program. Foundation courses are mandatory courses that are offered through the period of study of the program. Foundation courses are offered as fundamental, intermediate and advanced courses based on the prerequisite and difficulty level (100 Level / 200 Level / 300 Level etc.) of the course. Elective courses are a basket of courses from which the student gets to choose. Elective courses are either specialization courses or generic courses. Elective courses include mini projects, dissertations, internships and capstone projects. Students also have the option to choose from a set of interdisciplinary courses which are varied from their discipline and offered by other Schools of Studies of the University.

Mandatory segments are those which lay a firm foundation of the knowledge required to complete a programme in the chosen domain, ending with a multifaceted assignment that serves as a culminating academic and intellectual experience for students, typically during their final year.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

2) Common Core (Credit Courses): Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

3) Common Core (Non-credit Courses / Engagement) - Graduate Requirement (GR):

Engagements for this category do not carry any credit(s) but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree. These shall be:

- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.
- b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.

4) Advanced Course: Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.

5) Prerequisite course: Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline

- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.
- **500 Level Courses:** These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline.
- **600 Level Courses:** These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level.
- **700 Level Courses:** The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.

<p>17PGMD 3.6</p>	<p>Seminars: Some Programmes may prescribe Seminar as a requirement for the degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published technical literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.</p>
<p>17PGMD 3.7</p>	<p>Project Work/Dissertation and Summer Internship Program (SIP): Project work/Dissertation and/or SIP is considered as a special course involving application of knowledge in solving / analyzing /exploring a real-life situation/ difficult problem. A Project/ Dissertation work would be for specified number of credits, as prescribed in the Scheme of Teaching and Evaluation. A Project/Dissertation work may be given in lieu of a discipline specific elective paper. Summer Internship Program, wherever needed, may be introduced as a (or a part of) Project.</p>
<p>17PGMD 3.8</p>	<p>Audit Courses: A student desirous of additional exposure to a course, without the rigors of obtaining a good grade, 'audits' a course. The minimum requirement of attendance for an 'Audit Course' is 75%, with any additional requirements as set by the instructor such as submission of assignments and minimum performance in some of the in-semester evaluations. Auditing of courses during regular semesters from 3rd semester onwards is permitted under the following conditions:</p> <ol style="list-style-type: none"> 1) Students with CGPA> 6.0 will be permitted to 'Audit' a course. A course can be audited provided the course is offered in the semester as a credit course for others, and there is no slot clash. Prior permission of the Instructor is required. 2) Audit courses would be restricted to a maximum of two (2) courses per student in the entire period of the programme. 3) The instructor would award the 'AU' grade, if the attendance is satisfactory and additional requirements, as set out by the instructor, are met. The grade 'AU' does not carry any grade points and therefore does not figure in SGPA/ CGPA calculations. 4) The course successfully completed in Audit mode will be reflected in the Grade Card, Grade Certificate and the Transcript as Audit Course.

<p>17PGMD 3.9</p>	<p>Registration: It is mandatory for every student to register for a semester to attend various courses/ earn credits, using the prescribed Course Registration Form (CRF), till he completes his programme. It prescribes all the courses/ clinical/ other requirements for the degree and sets out the nominal sequence semester wise. It also provides the syllabus and a list of text/ reference books (or other learning material sources) for each course.

17PGLM 3.3	<p>Course Credit Structure:</p> <p>1) A certain quantum of academic work, measured in terms of credits, is laid down as the requirement for completion of degree in the different programs and the available specialization areas. A student earns credits by satisfactorily completing courses/other academic activities every semester.</p> <p>2) The credits are distributed semester wise, as prescribed in the Scheme of Teaching and Evaluation for each of the programmes. The courses generally progress in sequences, building competencies as per the course learning outcomes. The positioning of a course indicates certain academic maturity on the part of the students.</p> <p>3) Some courses do, in addition, specify passing in other courses, offered earlier in the programmes, as prerequisites for the course.</p> <p>4) Students are required to follow the semester wise schedule of courses specified in Scheme of Teaching and Evaluation; they do, however, have freedom to follow alternative schedules to optimize their academic profile with additional courses, keeping the requirements for each course in mind. For students with backlog courses, such rescheduling may even become necessary. Such departures from suggested schedules need to be done very carefully, and always with advice from the Faculty Adviser.</p>

However, CGPA is calculated at the end of each semester from the second semester onwards and reflected in the grade certificate for indicating the progress of the student. 2) Each course in a program is associated with number of credits (C). Based on the number of Credits for a course and obtained Grade Point (GP) for that course in a Semester, the GPA is calculated as given below: <ol style="list-style-type: none"> a) The SGPA is the ratio of sum of the product of the number of credits with the grade points secured by a student in all the courses taken by him and the sum of the number of credits of all the courses undergone by a student, i.e., $SGPA = \frac{\sum (C_i \times G_i)}{\sum C_i}$ Where C_i is the number of credits of the i^{th} course and G_i is the grade point scored by the student in the i^{th} course.

	<p>b) The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e., $CGPA = \sum (C_n \times S_n) / \sum C_n$</p> <p>Where S_n is the SGPA of the n^{th} semester and C_n is the total number of credits in that semester.</p> <p>Finally the SGPA and CGPA shall be rounded off to 2 decimal places.</p>

A student earns credits by satisfactorily completing courses/ other academic activities every semester. 2) The credits are distributed semester wise, as prescribed in the Scheme of Teaching and Evaluation for each of the programmes. The courses generally progress in sequences, building competencies as per the course learning outcomes. The positioning of a course indicates certain academic maturity on the part of the students.

	<p>3) Some courses do, in addition, specify passing in other courses, offered earlier in the programmes as prerequisites for the course.</p> <p>4) Students are required to follow the semester wise schedule of courses specified in Scheme of Teaching and Evaluation; they do, however, have freedom to follow alternative schedules to optimize their academic profile with additional courses, keeping the requirements for each course in mind. The requirements for Seminar/ Project/Internship/ Dissertation based courses will, be as specified in the course-guidelines/details approved by the Board of the Studies of the School. 6) Graduate Requirement (GR) Courses: These are courses on peripheral subjects in a programme, wherein completion of the course is considered mandatory to qualify for the award of the Degree. 7) Project work, Mini Project work and Internship and Seminar are also considered as courses in the programme.

The Courses of the Programme are further classified as follows:

1) Program Core (Credit Courses): Each academic programme is divided into Program Core or Common core courses which are further divided into mandatory and choice segments, with levels within them.

The Program Core courses are broadly categorized into Foundation, Electives and Interdisciplinary.

Foundation, Elective and interdisciplinary courses are discipline specific or allied to the program. Foundation courses are mandatory courses that are offered through the period of study of the program. Foundation courses are offered as fundamental, intermediate and advanced courses based on the prerequisite and difficulty level (100 Level / 200 Level / 300 Level etc.) of the course. Elective courses are a basket of courses from which the student gets to choose. Elective courses are either specialization courses or generic courses. Elective courses include mini projects, dissertations, internships and capstone projects. Students also have the option to choose from a set of interdisciplinary courses which are varied from their discipline and offered by other Schools of Studies of the University.

Mandatory segments are those which lay a firm foundation of the knowledge required to complete a programme in the chosen domain, ending with a multifaceted assignment that serves as a culminating academic and intellectual experience for students, typically during their final year.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

2) Common Core (Credit Courses): Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

3) Common Core (Non-credit Courses / Engagement) - Graduate Requirement

(GR): Engagements for this category do not carry any credit(s) but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree. These shall be:

- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.
- b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.

4) Advanced Course: Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.

5) Prerequisite course: Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline

- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.
- **500 Level Courses:** These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline.
- **600 Level Courses:** These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level.
- **700 Level Courses:** The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.

17PGBD 3.6	<p>Seminars:</p> <p>Some Programmes may prescribe Seminar as a requirement for the degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published technical literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.</p>
17PGBD 3.7	<p>Project Work/Dissertation and Summer Internship Program (SIP):</p> <p>Project work/Dissertation and/or SIP is considered as a special course involving application of knowledge in solving / analyzing /exploring a real-life situation/ difficult problem. A Project/ Dissertation work would be for specified number of credits, as prescribed in the Scheme of Teaching and Evaluation. A Project/Dissertation work may be given in lieu of a discipline specific elective paper.</p> <p>Summer Internship Program, wherever needed, may be introduced as a (or a part of) Project.</p>
17PGBD 3.8	<p>Audit Courses:</p> <p>A student desirous of additional exposure to a course, without the rigors of obtaining a good grade, 'audits' a course. 22PGBD 3.0	CHOICE BASED CREDIT SYSTEM AND ACADEMIC PROCESS
22PGBD 3.1	<p>Odd & Even Semesters and Summer Term:</p> <p>The University follows the Choice Based Credit System and the Semester Scheme. There are two regular semesters and one additional semester in an academic year. The semester that begins in August (August to November/ December) is known as the Odd Semester and the semester that begins in January (January to April/May) is known as the Even Semester. During the summer vacation (May/June to July), the Summer term is conducted to offer courses as per 22PGBD 3.2.</p>
22PGBD 3.2	<p>Summer Term:</p> <p>The summer term is additional semester that is conducted during an academic year. However, during a summer term, a limited number of courses maybe offered to enable the students to clear their backlog courses (F-RR) and/or register for additional regular credit courses on audit basis, subject to strict adherence to the following guidelines:</p> <ol style="list-style-type: none"> 1) The Program Council shall identify the courses to be offered along with the Course Instructor and recommend offering of such summer course (s) to the Dean for consideration. The identified faculty members shall offer the courses only on approval by the Dean. 2) The course is offered in the same manner as a regular semester course without compromising the course requirements in terms of knowledge delivery, course work, assessment and evaluation. The University shall notify the fee payable by the students for the summer semester courses. 3) The duration of the course is six to eight weeks. The registration, examination, assessment and grading etc. are done in the same way as is done for regular semester courses. The total number of contact hours for the courses remains the same as that during the regular semesters, and therefore, the courses are run at an accelerated pace. The Academic Calendar specially made in this connection shall be strictly followed. 4) The dropping of a Summer Course is permitted within 7 days from the first lecture of the course. However, the registration fee paid for the course is not refundable. 5) Time slots will be assigned and notified by the Dean as done for the regular semester courses. 6) A notified summer course can be withdrawn if the number of students registered for the course is less than five. 7) A student can register up to a maximum of 12 credits or 3 courses in any summer semester, depending on his academic standing. 8) Courses offered in a summer semester will be treated as equivalent to a regular semester courses for all accounting purposes.

22PGBD 3.3	<p>Curriculum:</p> <ol style="list-style-type: none"> 1) Every Programme has a prescribed course structure which, in general terms, is known as the Curriculum or the Courses of Study or the Scheme of Teaching and Evaluation. It prescribes all the courses/ laboratory/ other requirements for the degree and sets out the nominal sequence semester wise. It also provides the syllabus and a list of text/ reference books (or other learning material sources) for each course. 2) The University shall not only lay down the syllabus for each course, but also the manner of its implementation, namely, through lectures, tutorials, laboratory sessions, seminars, field work, projects and such other activities. 3) The Courses of Study details are updated every semester and are made available at the School's page of the University website: http://www.cmr.edu.in/. 4) Curriculum may also include SWAYAM or Massive Open Online Courses (MOOCs), offered by premier Institutions worldwide. However, selection of SWAYAM or MOOCs, if any, shall always be within prescribed guidelines of the relevant regulatory bodies.
22PGBD 3.4	<p>Course Credit Structure:</p> <ol style="list-style-type: none"> 1) A certain quantum of academic work, measured in terms of credits, is laid down as the requirement for completion of degree in the different programme and the available specialization areas. A student earns credits by satisfactorily completing courses/ other academic activities every semester. 2) The credits are distributed semester wise, as prescribed in the Scheme of Teaching and Evaluation for each of the programme. The courses generally progress in sequences, building competencies as per the course learning outcomes. The positioning of a course indicates certain academic maturity on the part of the students. 3) Some courses do, in addition, specify passing in other courses, offered earlier in the programmes as prerequisites for the course. 4) Students are required to follow the semester wise schedule of courses specified in Scheme of Teaching and Evaluation; they do, however, have freedom to follow alternative schedules to optimize their academic profile with additional courses, keeping the requirements for each course in mind. For students with backlog courses, such rescheduling may even become necessary. Such departures from suggested schedules need to be done very carefully, and always with advice from the Faculty Adviser.

22PGBD 3.5

Courses:

There will be following types of courses in a programme, namely:

- 1) Core Courses (CC): including essential foundation and functional management skill courses, considered to be useful for all management graduates irrespective of their choice of elective group/ specialization.
- 2) Core Elective (CE): including additional knowledge and skill courses, considered to be useful for developing additional skills/ competencies, irrespective of elective group/ specialization.
- 3) Advanced Core (AC): including knowledge and skill courses, considered to be useful for developing management skills/ competencies with inter-functional perspectives in management.
- 4) Elective Courses (EC): including knowledge and skill courses focusing on function/ sector specific management skills/ competencies leading to focused study in an elective group/ specialization area.
- 5) Project work/ Internship/ Seminars/ Dissertations can also be offered as independent course in the programme subject to allocation of required credit hour allocation to the course. The requirements for Seminar/ Project/Internship/ Dissertation based courses will, be as specified in the course-guidelines/details approved by the Board of the Studies of the School.
- 6) Graduate Requirement (GR) Courses: These are courses on peripheral subjects in a programme, wherein completion of the course is considered mandatory to qualify for the award of the Degree.
- 7) Project work, Mini Project work and Internship and Seminar are also considered as courses in the programme.

The Courses of the Programme are further classified as follows:

- 1) Program Core (Credit Courses):** Each academic programme is divided into Program Core or Common core courses which are further divided into mandatory and choice segments, with levels within them.

The Program Core courses are broadly categorized into Foundation, Electives and Interdisciplinary.

Foundation, Elective and interdisciplinary courses are discipline specific or allied to the program. Foundation courses are mandatory courses that are offered through the period of study of the program. Foundation courses are offered as fundamental, intermediate and advanced courses based on the prerequisite and difficulty level (100 Level / 200 Level / 300 Level etc.) of the course. Elective courses are a basket of courses from which the student gets to choose. Elective courses are either specialization courses or generic courses. Elective courses include mini projects, dissertations, internships and capstone projects. Students

also have the option to choose from a set of interdisciplinary courses which are varied from their discipline and offered by other Schools of Studies of the University.

Mandatory segments are those which lay a firm foundation of the knowledge required to complete a programme in the chosen domain, ending with a multifaceted assignment that serves as a culminating academic and intellectual experience for students, typically during their final year.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

- 2) Common Core (Credit Courses):** Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

- 3) Common Core (Non-credit Courses / Engagement) - Graduate Requirement (GR):** Engagements for this category do not carry any credit(s) but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree. These shall be:
- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.

- b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.
- c) **Advanced Course:** Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.
- d) **Prerequisite course:** Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline
- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.

	<ul style="list-style-type: none"> • 500 Level Courses: These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline. • 600 Level Courses: These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level. • 700 Level Courses: The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.
22PGBD 3.6	<p>Seminars:</p> <p>Some Programmes may prescribe Seminar as a requirement for the degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published technical literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.</p>
22PGBD 3.7	<p>Project Work/Dissertation and Summer Internship Program (SIP):</p> <p>Project work/Dissertation and/or SIP is considered as a special course involving application of knowledge in solving / analyzing /exploring a real-life situation/ difficult problem. A Project/ Dissertation work would be for specified number of credits, as prescribed in the Scheme of Teaching and Evaluation. A Project/Dissertation work may be given in lieu of a discipline specific elective paper.</p> <p>Summer Internship Program, wherever needed, may be introduced as a (or a part of) Project.</p>

22PGBD 3.8	<p>Audit Courses:</p> <p>A student desirous of additional exposure to a course, without the rigors of obtaining a good grade, 'audits' a course. The minimum requirement of attendance for an 'Audit Course' is 75%, with any additional requirements as set by the instructor such as submission of assignments and minimum performance in some of the in-semester evaluations. Auditing of courses during regular semesters from 3rd semester onwards is permitted under the following conditions:</p> <ol style="list-style-type: none"> 1) Students with CGPA > 6.0 will be permitted to 'Audit' a course. A course can be audited provided the course is offered in the semester as a credit course for others, and there is no slot clash. Prior permission of the Instructor is required. 2) Audit courses would be restricted to a maximum of two (2) courses per student in the entire period of the programme. 3) The instructor would award the 'AU' grade, if the attendance is satisfactory and additional requirements, as set out by the instructor, are met. If the attendance and performance is not satisfactory, the instructor will award 'No Grade'. The grade 'AU' does not carry any grade points and therefore does not figure in SGPA/ CGPA calculations. 4) The course successfully completed in Audit mode will be reflected in the Grade Card, Grade Certificate and the Transcript as Audit Course.
22PGBD 3.9	<p>Registration:</p> <p>It is mandatory for every student to register for a semester to attend various courses/ earn credits, using the prescribed Course Registration Form (CRF), till he completes his programme. The registration shall be completed on or before the prescribed last date for registration announced in the academic calendar.</p> <ol style="list-style-type: none"> 1) On joining the Programme, each student is assigned to a Faculty Adviser or an Advisory group. A student shall register for required courses each semester with prior permission of the Faculty Adviser. 2) The student can register for courses he intends to take during a given semester (including courses in summer semester) on the basis of his plan for each Programme, as given in the Scheme of Teaching and Evaluation and as per the advice given by his Faculty Adviser. 3) The Faculty Adviser is expected to discuss with the student his academic performance during the previous semesters and then decide the number and nature of the courses for which the student can register during the semester within the framework of the Regulations.

	<p>4) The Faculty Adviser may advise the student to drop one or more courses/activities based on his academic performance. The Faculty Adviser may even advise a reduced load program over several semesters for students with poor performance at the end of the first semester/year.</p> <p>5) Students are not permitted to reregister for course/(s), which they have already passed.</p> <p>6) The registration is deemed to be complete only on approval by the Dean.</p> <p>7) Without registration, any academic activity (course/seminar etc.) undergone by a student will not be counted towards the requirements of his degree.</p> <p>8) Students having outstanding dues to the University or a hostel shall not be permitted to register.</p>
22PGBD 3.10	<p>1) Procedure for Registration: The procedure involves the following steps:</p> <p>a) A student is required to register for all the courses listed in the curriculum for the first semester.</p> <p>b) The students shall decide on the courses to be registered during the ensuing semester immediately after their SEE examinations as per the advise of their Faculty Advisor.</p> <p>c) They shall submit a print out of the completed CRF, duly attested by the faculty advisor to the Dean through the department office within the date notified by the University for registration.</p> <p>d) Every student from II semester onwards is required to register for a minimum of 20 credits and a maximum of 28 credits.</p> <p>2) Registration for second and subsequent semesters:</p> <p>a) From second semester onwards, registration is dependent on the academic standing of the student. A student with a low academic standing registers for the academic load specified by the Faculty Adviser. In addition he may add one more course (3-5 credits) towards additional learning or to clear backlog courses, without this being considered an overload.</p> <p>b) Students with average academic standing are advised not to attempt full load. Faculty Advisers after careful scrutiny will advise academic loads depending on previous performance.</p> <p>3) Late Registration: Registration beyond the last date may be permitted only in special cases till the date specified in the Academic Calendar, on payment of a late registration fee.</p>

22PGBD 3.11	<p>Registration for Graduate Requirement (GR) Courses:</p> <p>Graduate Requirement (GR) courses which are mandatory Non-credit courses are treated as complete or incomplete subject to the fulfillment of the minimum requirements of these courses and a minimum of 75% attendance. The award of degree is subject to successful completion of these courses. Formal registration for these courses shall be done along with other courses, at the beginning of the semesters.</p> <p>Not satisfying the minimum requirements of the course will result in a F-RR grade and the student has to re- register for the course when offered next. This requirement must be completed before the end of the Programme.</p>
22PGBD 3.12	<p>Registration for Summer Semester Courses:</p> <p>Students are permitted to register for courses during summer semester under the regulation specified by 22PGBD 3.2, on payment of prescribed registration and course fees.</p>
22PGBD 3.13	<p>Course Adjustment/Dropping of Courses:</p> <ol style="list-style-type: none"> 1) The Academic Calendar sets a date, normally two weeks after the commencement of the semester, for Course Adjustment. On or before this date, a student is permitted to make adjustments in his academic load by addition or deletion of one or more courses, projects etc., provided that the total credits do not exceed 28 or fall below 20, by such adjustments, Course adjustment has to be done in consultation with the Faculty Adviser. When the need for course adjustment through addition, substitution or dropping of course/s arises, the student without any backlog should do online course adjustment and students with backlog course/s should do it manually by filling a Course Adjustment Form (CAF). CAF has to be signed by both the student and the Faculty Adviser and the same is to be submitted to the Dean. 2) If in the second or any of the subsequent semesters, a student finds his academic load too heavy, he may drop one or two courses out of the registered ones on advice from the Faculty Adviser, provided the minimum credit requirements is fulfilled. The last date for doing this is within 10 days after the end of the first test, or as specified in the Academic Calendar. 3) Course/s dropped by a student may be taken during a subsequent semester including the summer semester, if offered. <p>The minimum number of students to be registered for an Elective to be offered shall be not less than ten, or as decided by the University.</p>

22PGBD 3.14	<p>Course substitution: In case a student obtains E grades or drops courses due to a valid reason or fails in a course, he may like to substitute courses in order to complete the course requirements within the stipulated duration. Following are the guidelines for course substitution:</p> <ol style="list-style-type: none"> 1) Course substitution is not permitted for Core Courses. The student has to reregister for the same courses and complete them. 2) An elective course may be substituted by another elective course from the same group.

Choice segments are those which a student could opt for to specialize further and / or to improve their interdisciplinary skills.

All segments carry credits, and the students are expected to earn the minimum number of credits in their coursework towards program core to earn the degree.

- 2) Common Core (Credit Courses):** Common Core Curriculum (CCC) courses are to be pursued by all students of the University regardless of their School of Study. It also encourages students to explore themselves and issues of fundamental importance to society through the Common Core Curriculum (CCC) courses. Students are expected to earn a certain specified number of credits in their coursework towards the Common Core Curriculum (CCC), during their academic programmes. While some courses are in workshop mode, which can be completed over a few days at a stretch, there are other courses which are offered for a specific number of hours per week throughout a semester.

Students take these courses planned for each academic programme, over multiple semesters. Credits range from 1 to 4, which are directly proportional to the number of hours required to complete a course. There are both 'mandatory' and 'choice' courses, with levels within them.

- 3) Common Core (Non-credit Courses / Engagement) - Graduate Requirement (GR):** Engagements for this category do not carry any credit(s) but are mandatory for the students to complete them within the duration of the programme, to be considered eligible to graduate (or) earn the degree. These shall be:
- a) **Courses** embedded in the academic programme, where the students must ensure that they attend a minimum attendance percentage.

- b) **Community Service Program** are activities implemented under the Common Core Curriculum Community Service Program (CCC CSP) in which the students have to complete a minimum number of volunteering hours in a semester by rendering services to the society and submit a Reflection Record (RRD) for every volunteering activity completed. In case of a student not having completed the minimum number of volunteering hours in a semester, the shortage in number of hours is to be completed in the subsequent semester(s). However, the student has to complete the mandated total number of volunteering hours within the duration of the programme and submit a Reflection Record (RRD) for every volunteering activity completed.
- c) **Advanced Course:** Courses that involve higher and more complex levels of knowledge and understanding than introductory or foundational learning. It means the student has attained a level of knowledge and understanding of a particular area or topic that goes beyond basic terminology and definitions and is ready to be involved in Analysis, Synthesis and Evaluation of information related to a specific topic or area of learning.
- d) **Prerequisite course:** Course or other requirement that a student must have taken prior to enrolling in a specific course. Students might or might not have a choice of prerequisites to complete.

Courses under various categories can be further classified as:

- **100 Level Courses:** These courses offer an introduction to a subject area and are designed for students in the first year of study. These courses have no prerequisites and are generally courses defining basic concepts or presenting the terminology of a discipline
- **200 Level Courses:** These courses are built on previous units and are normally taken in the second year or later; they may also be available to students with advanced prior knowledge. They are Courses of intermediate college-level difficulty; courses with 100-level course(s) as prerequisite(s)
- **300 Level Courses:** These courses are usually taken in third year or later, after 200-level study in the area. They may also be available to students with advanced prior knowledge. They are courses of advanced college-level difficulty offered for students clearly interested in the discipline or in any stream of the discipline
- **400 Level Courses:** These units of study are advanced courses and are normally taken in the third year or later as the final elements of a three year or four year degree or an integrated degree. The level indicates that the student will be demonstrating coherence and breadth or depth of knowledge and skills. The student may need to have completed a prerequisite course to study a 400 level course.

	<ul style="list-style-type: none"> • 500 Level Courses: These are foundation level courses for higher education qualifications, usually taken in the first year of the masters or postgraduate degree programmes. These are courses meant for students aspiring to specialise in a discipline and would have prerequisites to study a course at this level, which would have been covered in the core curriculum at the bachelor's degree programme in the same discipline. • 600 Level Courses: These courses are usually opted for at the second year of the masters or postgraduate degree programmes, which enhance the learning experience of the previous units. The difficulty level is clearly higher and the student is expected to demonstrate a certain level of proficiency and competence in grasping and interpreting the knowledge gained in the discipline at this level. • 700 Level Courses: The courses prescribed at this level serve as a culminating academic and intellectual experience for students, and are usually taken towards the final semesters of the masters or postgraduate degree programmes where they acquire the skills and knowledge to analyse, evaluate, and solve challenges akin to those faced in real life situations, resulting in achieving mastery in the discipline.
22PGBD 3.6	<p>Seminars:</p> <p>Some Programmes may prescribe Seminar as a requirement for the degree. Seminar may be an assessment component or a course itself wherein the student is expected to do an in-depth study in a specialized area under the guidance of a faculty member. This may include surveying published technical literature, understanding different aspects of the problem and arriving at a status report. While doing a seminar, the student is expected to: critically analyze works of various authors/ researchers; learn the investigation methodologies, study concepts, techniques and the results presented in these papers; and submit a seminar report. It is mandatory to give a seminar presentation before a panel constituted for the purpose. Seminars typically carry 1 to 2 credits.</p>
22PGBD 3.7	<p>Project Work/Dissertation and Summer Internship Program (SIP):</p> <p>Project work/Dissertation and/or SIP is considered as a special course involving application of knowledge in solving / analyzing /exploring a real-life situation/ difficult problem. A Project/ Dissertation work would be for specified number of credits, as prescribed in the Scheme of Teaching and Evaluation. A Project/Dissertation work may be given in lieu of a discipline specific elective paper.</p> <p>Summer Internship Program, wherever needed, may be introduced as a (or a part of) Project.</p>

22PGBD 3.8	<p>Audit Courses:</p> <p>A student desirous of additional exposure to a course, without the rigors of obtaining a good grade, 'audits' a course. The minimum requirement of attendance for an 'Audit Course' is 75%, with any additional requirements as set by the instructor such as submission of assignments and minimum performance in some of the in-semester evaluations. Auditing of courses during regular semesters from 3rd semester onwards is permitted under the following conditions:</p> <ol style="list-style-type: none"> 1) Students with CGPA > 6.0 will be permitted to 'Audit' a course. A course can be audited provided the course is offered in the semester as a credit course for others, and there is no slot clash. Prior permission of the Instructor is required. 2) Audit courses would be restricted to a maximum of two (2) courses per student in the entire period of the programme. 3) The instructor would award the 'AU' grade, if the attendance is satisfactory and additional requirements, as set out by the instructor, are met. If the attendance and performance is not satisfactory, the instructor will award 'No Grade'. The grade 'AU' does not carry any grade points and therefore does not figure in SGPA/ CGPA calculations. 4) The course successfully completed in Audit mode will be reflected in the Grade Card, Grade Certificate and the Transcript as Audit Course.
22PGBD 3.9	<p>Registration:</p> <p>It is mandatory for every student to register for a semester to attend various courses/ earn credits, using the prescribed Course Registration Form (CRF), till he completes his programme. The registration shall be completed on or before the prescribed last date for registration announced in the academic calendar.</p> <ol style="list-style-type: none"> 1) On joining the Programme, each student is assigned to a Faculty Adviser or an Advisory group. A student shall register for required courses each semester with prior permission of the Faculty Adviser. 2) The student can register for courses he intends to take during a given semester (including courses in summer semester) on the basis of his plan for each Programme, as given in the Scheme of Teaching and Evaluation and as per the advice given by his Faculty Adviser. 3) The Faculty Adviser is expected to discuss with the student his academic performance during the previous semesters and then decide the number and nature of the courses for which the student can register during the semester within the framework of the Regulations.

	<p>4) The Faculty Adviser may advise the student to drop one or more courses/activities based on his academic performance. The Faculty Adviser may even advise a reduced load program over several semesters for students with poor performance at the end of the first semester/year.</p> <p>5) Students are not permitted to reregister for course/(s), which they have already passed.</p> <p>6) The registration is deemed to be complete only on approval by the Dean.</p> <p>7) Without registration, any academic activity (course/seminar etc.) undergone by a student will not be counted towards the requirements of his degree.</p> <p>8) Students having outstanding dues to the University or a hostel shall not be permitted to register.</p>

A student with a low academic standing registers for the academic load specified by the Faculty Adviser. In addition he may add one more course (3-5 credits) towards additional learning or to clear backlog courses, without this being considered an overload.</p> <p>b) Students with average academic standing are advised not to attempt full load. Faculty Advisers after careful scrutiny will advise academic loads depending on previous performance.</p> <p>3) Late Registration: Registration beyond the last date may be permitted only in special cases till the date specified in the Academic Calendar, on payment of a late registration fee.</p>

22PGBD 3.11	<p>Registration for Graduate Requirement (GR) Courses:</p> <p>Graduate Requirement (GR) courses which are mandatory Non-credit courses are treated as complete or incomplete subject to the fulfillment of the minimum requirements of these courses and a minimum of 75% attendance. The award of degree is subject to successful completion of these courses. Formal registration for these courses shall be done along with other courses, at the beginning of the semesters.</p> <p>Not satisfying the minimum requirements of the course will result in a F-RR grade and the student has to re- register for the course when offered next. This requirement must be completed before the end of the Programme.</p>
22PGBD 3.12	<p>Registration for Summer Semester Courses:</p> <p>Students are permitted to register for courses during summer semester under the regulation specified by 22PGBD 3.2, on payment of prescribed registration and course fees.</p>

When the need for course adjustment through addition, substitution or dropping of course/s arises, the student without any backlog should do online course adjustment and students with backlog course/s should do it manually by filling a Course Adjustment Form (CAF). CAF has to be signed by both the student and the Faculty Adviser and the same is to be submitted to the Dean. 2) If in the second or any of the subsequent semesters, a student finds his academic load too heavy, he may drop one or two courses out of the registered ones on advice from the Faculty Adviser, provided the minimum credit requirements is fulfilled. The last date for doing this is within 10 days after the end of the first test, or as specified in the Academic Calendar. 3) Course/s dropped by a student may be taken during a subsequent semester including the summer semester, if offered. <p>The minimum number of students to be registered for an Elective to be offered shall be not less than ten, or as decided by the University.</p>

22PGBD 7.1	<ol style="list-style-type: none"> 1) A theory, stand-alone practical/project or Theory with practical/project shall be treated as a head of passing. 2) The Mandatory Graduate Requirement Non-credit courses (GR) shall not be considered for progression to higher semesters, award of Class, and calculation of SGPA and CGPA. However, completion of these courses is mandatory for award of the Degree. 3) There shall be no restriction for promotion to 2nd semester from 1st semester, if the student has fulfilled the attendance requirement. 4) Third semester onwards, a student is permitted to register for higher semester/level courses, if he obtains a minimum of 50% of the credits till the previous semester as per the Scheme of Teaching and Evaluation, to an extent of 28 credits in total, subjected to the condition under clause 22BSET3.10 (1) (d). 5) Students failing to satisfy the clause (4) above, shall register for the remaining credits subjected to the condition under clause 22BSET 3.10 (1) (d) and earn the required number of credits for progression.

22PGBD 8.0	PASSING STANDARDS AND CLASS DECLARATION
22PGBD 8.1	<p>Computation of SGPA and CGPA:</p> <p>1) Semester Grade Point Average (SGPA) will be awarded at the end of each Semester and Cumulative Grade Point Average (CGPA) will be awarded at the end of the program. However, CGPA is calculated at the end of each semester from the second semester onwards and reflected in the grade certificate for indicating the progress of the student.</p> <p>2) Each course in a program is associated with number of credits (C). Based on the number of Credits for a course and obtained Grade Point (GP) for that course in a Semester, the GPA is calculated as given below:</p> <p>a) The SGPA is the ratio of sum of the product of the number of credits with the grade points secured by a student in all the courses taken by him and the sum of the number of credits of all the courses undergone by a student, i.e.,</p> $SGPA = \frac{\sum (C_i \times G_i)}{\sum C_i}$ <p>Where C_i is the number of credits of the i^{th} course and G_i is the grade point scored by the student in the i^{th} course.</p> <p>b) The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.,</p> $CGPA = \frac{\sum (C_n \times S_n)}{\sum C_n}$ <p>Where S_n is the SGPA of the n^{th} semester and C_n is the total number of credits in that semester.</p> <p>Finally the SGPA and CGPA shall be rounded off to 2 decimal places.</p>
22PGBD 8.2	<p>Passing Standards:</p> <p>1) A student shall be declared successful or 'passed' in a semester, only when he gets a SGPA of 5.00 earning credits as per the scheme of teaching and evaluation, with grade point of 5 or better in every registered course.</p> <p>2) A student shall be declared successful or 'passed' in the entire Post Graduate programme, only when he gets a minimum CGPA of 5.00 and has completed all the graduate requirement courses as mandated in the scheme of teaching and evaluation.</p>

22PGBD 8.3	<p>1) Conversion of Grade and Percentage of Marks: Conversion formula for the conversion of CGPA into Percentage is: Percentage of marks scored, $P = [\text{CGPA earned}] \times 10$</p> <p>2) Class Declaration: After the conversion of final CGPA into Percentage of Marks (PM), a graduating student is declared to have passed in</p> <ol style="list-style-type: none"> First Class with Distinction (FCD): $PM \geq 75\%$ (In First Attempt) First Class (FC): $60\% \leq PM < 75\%$ Second Class (SC): $50\% \leq PM < 60\%$
22PGBD 8.4	<p>Grade Cards, Certificates and Transcripts:</p> <p>1) Grade Cards: At the end of each semester, a Grade Card shall be issued to all the registered students of that semester, indicating the Course code, Title, Number of credits, Letter grade awarded and Credits earned, for all the Courses as specified in the scheme of teaching and evaluation. This may have F -RA or F - RR grades awarded to the student.</p> <p>2) Grade Certificate: On successful completion of all courses/earning credits, specified in a semester, the grade certificate is issued indicating the course details along with SGPA of that semester and also CGPA earned till that semester.</p> <p>3) Transcripts: Transcript is the consolidated statement of the Academic Performance of a student for all the semesters since joining the programme and is given to a student on successful completion of the programme along with the degree certificate.</p> <ol style="list-style-type: none"> For those students who have taken multiple attempts to clear a course, the transcript given on successful completion of the programme will only contain earned pass grade (O to P and AU); the courses cleared subsequently will however be shown in the respective semester with Month and Year in which the student has finally cleared the course. The transcript will show only the overall CGPA based on all the courses taken by the student. Additional courses will be shown separately, indicating the grade earned by the student. Additional copies of the transcript can be obtained if needed, on request submitted along with payment of applicable fee. Students who have not yet completed the programme can obtain an interim Transcript at the end of any semester, if needed, on request and upon payment of applicable fee. The interim Transcript includes failed courses, which have not been cleared at the time of issue.

22PGBD 9.0	ELIGIBILITY FOR THE AWARD OF DEGREE, PRIZES, MEDALS AND RANKS
22PGBD 9.1	<p>Minimum Credit Requirement:</p> <p>1) A student shall obtain a total of at least 108 credits as specified by the University along with satisfying the passing standards as per 22PGBD 8.2 to be eligible for the award of MCA degree.</p>
22PGBD 9.2	For the award of Prizes and Medals, the conditions stipulated by the Donor/ University may be considered subject to the provisions of the statutes of the University for such awards from time to time.
22PGBD 9.3	For award of ranks in the programme, a minimum of 10 students should have appeared in the final semester examination. The total number of ranks awarded shall be 10% of total number of students appeared in final semester.

22PGBD 9.6	If two students get the same CGPA, the tie should be resolved by considering the number of times a student has obtained higher SGPA. But, if it is not resolved even at this stage, the number of times a student has obtained higher grades like O, A+, A, B, C & P shall be taken into account in Rank ordering of the students.
22PGBD 10.0	MAXIMUM DURATION FOR PROGRAMME COMPLETION
22PGBD 10.1	The student shall complete the MCA programme within a period of four (04) academic years respectively, failing which he has to discontinue the program. The duration is from the date of admission to the program.

A student of School of Social Sciences and Humanities at CMRU, Divya paved the way for countless others to follow suit and become confident, culturally aware, and globally-connected individuals.

At the heart of this innovative educational undertaking lies the vision of Dr. Babu Devasenapati S, Director of OSA, Partnerships & Global Immersion. Through the Global Immersion Programme, the students get to be exposed to a melting pot of traditions, beliefs, and values, challenging their preconceived notions and nurturing a profound appreciation for diversity. This in turn enables them to broaden their perspective and enrich their personal growth while fortifying their academic and professional pursuits.
