WHY INDIA LAGS BEHIND IN RESEARCH

India is home to premier institutes like IITs, yet when it comes to research, it lags behind. A recent report by British higher education analyst Quacquarelli Symonds with data from the research analytics platform SciVal, mentions that though India's research output is more than double the global average (between 2017 and 2022, India's research output grew by around 54 per cent, taking it to the fourth position globally in producing academic papers), it lags behind in citations as it stood ninth globally.

Shaji of IISER says that research must not only be limited to theoretical studies but must find applications in industry as well. He suggests an industrial partnership wherein industry leaders can guide researchers on real world applications. "Our new I2 science programme (integrated and interdisciplinary sciences) focuses on applied aspects of science, whether it is medicinal chemistry or bio-physics so that students can not only indulge in research but also take up the skill, jobs or even start new ventures in these kinds of areas," he says.

When it comes to newer technologies and rapidly advancing AI and robotic systems, India is behind in terms of citations. Last year, former Niti Aayog chairman Amitabh Kant, too, noted that the country lags behind in artificial intelligence research and needs to elevate its supercomputing capabilities. He had noted that India falls behind in core and applied research and must take efforts to catch up with the US and China.

Prof Ashish Verma, convenor, sustainable transportation lab, Indian Institute of Science, Bengaluru, makes a case for governmental

Various state and centrally sponsored scholarships and initiatives have bridged the gender gap and played a significant role in attracting more women to pursue STEM courses. As a result, we are witnessing a positive transformation in the representation of women in traditionally male-dominated fields of science, technology, engineering and mathematics.

good laboratory infrastructure, qualified teachers and so on. "We are producing professionals who use their scientific training as part of their job, so that level of infrastructure and

trained," he says. "With economic value being added and the creation of property, we need enough to put their unique knowledge to actual, productive use in society."

However, finding good faculty is a challenge, according to Banerjee. He says that when students are now asked if they would like to become educators, very few show interest. He says that IITs are fortunate in being able to find good faculty, but at many institutions that is a problem. "Becoming a teacher should be a good career choice for young people, but currently that is not always the case," he says. "Efforts must be made to change that."

Moreover, because technology is developing rapidly, it is a challenge to keep up with the pace of development, says Prof John Varghese, principal, St. Stephen's College. "By the time you invest in equipment, the technology becomes redundant," he says. Therefore, a constant update is required." To fix this, St. Stephen's, apart from investing in updating infrastructure, fosters an attitude where young people and faculty are encouraged to link what they are studying with other areas and newer developments that are happening all over the world, says Varghese.

GOVERNMENT INITIATIVES

It was in 2020 that Prime Minister Narendra Modi launched the I-STEM portal as an important national programme to build a unique 'one nation, one research' web portal for the scientific community. Once researchers locate the desired facility through I-STEM, they can make an online reservation, paying for it through a secure payment gateway.
